PRODUCT WARRANTY INFORMATION

CATEGORY	SCUBAPRO PRODUCT	WARRANTY PERIOD
REGULATORS	1 st Stages, 2 nd Stages, Systems, and Air2s	Limited Lifetime*
REGULATURS	All Included Hoses and Mouthpieces	Two Years
BUOYANCY	Seams	Limited Lifetime*
COMPENSATOR DEVICES	Jacket (Not Including Seams), S-Tek Harnesses & Wings, All Included Hoses, Weight Pockets, and Balanced Power Inflators	Two Years
COMPUTERS/ INSTRUMENTS	Computers and Transmitters, Instruments, All Included Hoses, Consoles, Instruments, and Gauges	Two Years
FINS	Seawing Nova, Seawing Nova Full Foot, Twin Jet Max, Jet	Limited Lifetime
	Seawing Supernova, All Other Fins	Two Years
DRYSUITS	Drysuits, Undergarments	Two Years
LIGHTS	Lights	Two Years
OTHER	Masks, Snorkels, Cruiser Vest, Currents Vest, Wetsuits, Boots, Gloves, Hoods, Shorts, Rash Guards, Knives, Weight Belts, Bags, and all other items not listed above	Two Years

The above summary does not constitute an offer of warranty. *See Warranty Literature accompanying the product for Conditions.

SCUBAPRO warrants to the original, registered consumer purchaser that, for the period of two years from date of purchase, each SCUBAPRO product component not otherwise warranted, and each SCUBAPRO replacement part, purchased from an authorized SCUBAPRO dealer will be free from defects in materials and workmanship under normal use and with reasonable maintenance. The above retail warranty does not apply to Commercial, Keyman, Institutional, and Professional use of products and parts. These items have a two year warranty period from the date of purchase with no follow on warranty if replaced. For more information on commercial warranties, please see page 241. A list of authorized SCUBAPRO dealers can be obtained by calling 1-800-GO-SCUBA or at www.scubapro.com.

SCUBAPRO will, at its option, repair or replace without charge any warranted component or replacement part that is defective in materials or workmanship. Repair or replacement is SCUBAPRO's only responsibility and your only remedy under this warranty.

To obtain warranty service, you must deliver the affected component or part, together with your proof of purchase to any authorized SCUBAPRO dealer.

This warranty does not cover damage resulting from improper usage, improper maintenance, neglect of care or maintenance or

repair service performed by someone other than an authorized SCUBAPRO dealer.

ALL IMPLIED WARRANTIES, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR PARTICULAR PURPOSE, ARE LIMITED TO THE DURATION OF THIS WRITTEN WARRANTY. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

SCUBAPRO SHALL NOT BE LIABLE FOR LOSS OF USE OR ANY OTHER INCIDENTAL, CONSEQUENTIAL, OR INDIRECT COSTS, EXPENSES OR DAMAGES. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusions may not apply to you.

No salesperson, dealer or representative is authorized to make any modifications to this warranty or to make additional warranties on behalf of SCUBAPRO.

This warranty gives you specific legal rights, and you may also have other rights that may vary from state to state.

Technical Services Repair Policy

Any necessary repairs or upgrades at an added cost require the customer's approval. From the time we notify the Dealer, there will be a 30 day period for a decision to be made. If a decision hasn't been reached after these 30 days, the equipment will be returned to the Dealer in the current condition.

ABOUT DIVERS OUR OCEANS THE FUTURE OF THIS PLANET

For over 60 years, SCUBAPRO continues to be a leader in the dive industry, innovating with environmentally responsible products, materials, and manufacturing techniques, which is why our equipment is the first choice of scientists, researchers, professional divers and media producers worldwide. We have long-supported global and grassroots conservation organizations and we continue to seek out ways to protect the environments we love to explore.

RESPONSIBLE PACKAGING

We are continuously working to protect our environment through our Responsible Packaging program, which is tasked with reducing and eliminating the use of plastics in our product packaging where possible. These are some of the steps we have taken to reduce our plastic use:

- Almost all masks are packaged in either recycled carton boxes or in protective boxes that can also be used for transport and storage of accessories.
- Boots are shipped in fabric bags, which can be reused for transport and storage, or as a laundry or shoe bag.
- Gloves, headbands, neoprene mask straps and other accessories use recycled carton key cards as packaging.
- Regulator maintenance kits are shipped in plastic-free carton packaging.
- The majority of regulators and computers are shipped in recycled carton boxes or fabric bags.
- Almost all fins are shipping in either recycled carton boxes or mesh bags that can be reused for transport and storage or as an ocean clean-up bag to pick up trash while diving.
- Drysuits are shipped in a reusable fabric bag that can be used as a changing mat on the ground.
- Everflex YULEX® dive wetsuits are packaged in recycled paper bags for protection during shipping.

Eliminating plastic and reducing packaging overall is the goal of our Responsible Packaging program. Innovative packaging solutions for other products will be implemented in the near future.

TAKING ACTION ON SUSTAINABILITY

SCUBAPRO has been a leader of environmental initiatives in dive wear for many years. In 1999, SCUBAPRO implemented limestone neoprene into its dive wear line, an alternative to petroleum-based neoprene. In 2012, SCUBAPRO introduced X-Foam neoprene in an ongoing effort to reduce pollutants and harmful emissions. In 2016, we introduced solvent-free glue on Everflex suits. We also started using water-saving dope dyed yarn technology and carbon black from recycled tires. In 2022, SCUBAPRO introduced YULEX® dive – a plant-based material extracted from Forest Stewardship Council (FSC) certified renewable rubber tree farms – in our Everflex wetsuits in order to continue pushing the boundaries of sustainable dive wear and offer superb water compression resistance.

BUILDING AN OCEAN ETHOS

SCUBAPRO believes in working together to take on the biggest issues facing our oceans, while encouraging every diver to be conservation-minded. For over 60 years, we have partnered with large and small organizations that share these ideals. We continue to do this while supporting the work of our Global Dive Team ambassadors, local dive communities, and in embarking on a substantial coral reef restoration partnership with MOTE Marine Laboratory.

LIVING OUR VALUES

SCUBAPRO is staffed by avid divers who recognize a personal responsibility to preserve and protect the very thing that our products allow divers to explore. SCUBAPRO employees regularly participate in beach cleanups, events that welcome new divers, and other community functions that help build the next generation of ocean advocates.

SCUBAPRO partners with Mote Marine Laboratory on a coral reef restoration program open to SCUBAPRO dealers across the U.S.

MK25 EVO BT/A700 CARBON BT

A-SERIES

SCUBAPRO's flagship regulator system features a tough handmade carbon fiber cover (offering a 32-gram weight savings) on the A700's full-metal casing, plus a unique DLC Black Tech protective coating on both first and second stages. Offering superb breathing performance, excellent impact resistance and dependable protection against the ravages of salt water and corrosion, this race-car-sleek system looks as good as it works. Also included is a zippered fabric bag complete with specially fitted padding to protect the regulator during storage and transport.

12.770.040	INT 232

SCUBAPRO's premium regulator system is designed for divers who want the best. The MK25 EVO offers excellent resistance to freezing, superb inhalation sensitivity and instant delivery of air on demand. The A700 offers effortless inhalation and an ease of exhalation that is unmatched in a precision-handcrafted, full-metal package. Together they provide unparalleled breathing performance in all water temperatures.

MK19 EVO/A700

PRICE	
MRP	1,254.00
Part Number	Description
12.719.010	INT 232

The MK19 EVO/A700 takes our extraordinary breathing A700 and pairs it with an environmentally sealed MK19 EVO first stage that's extremely resistant to freezing and fouling of its inner mechanism. The MK19 EVO offers a dry ambient pressure chamber that is equipped with a double spring for optimum reliability, and a LP port swivel turret to maximize hose routing options. The muscular A700, with its precision handcrafted full-metal casing, front cover and valve housing, offers best-in-class breathing performance, including effortless inhalation and an ease of exhalation that is unmatched.

MK25 EVO/S600

S-SERIES

12.971.070

Combining one of SCUBAPRO's best-selling second stage and its top-performing first stage is a match made in diver heaven. The MK25 EVO offers excellent resistance to freezing, superb inhalation sensitivity and instant delivery of air on demand. The S600, with its rugged reinforced technopolymer casing and stainless steel front face and ring, provides a steady, effortless flow of air, regardless of depth or water temperature, in the most demanding dive conditions.

MK25T EVO/S620 X-Ti

SCUBAPRO's top regulator technology is on display in this ultra-light, corrosion-resistant regulator system. The MK25T EVO is machined from a solid block of titanium which will not corrode, even in concentrated saltwater conditions, promising a century of trouble-free use. It offers excellent resistance to freezing, superb inhalation sensitivity and instant delivery of air on demand. The S620 X-Ti, with its durable and good-looking titanium faceplate, embraces the best features of SCUBAPRO's renowned S600 in an upgraded, state-of-the-art design. Smaller and lighter than the S600 but using the same-sized diaphragm, the S620 X-Ti delivers excellent performance; work of breathing has been reduced by 37% over the S600, providing effortless airflow under all dive conditions. The full titanium face plate is ultra-light, the large purge button improves water circulation, and the exhaust tee increases performance while directing bubbles out of the field of view for the ultimate in lightweight performance.

MK25T EVO First Stage

- Air-balanced flow-through piston in a full titanium body provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate.
- Patented XTIS (Extended Thermal Insulating System) thermally insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue.
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures.
- Two opposing high pressure ports allow the first stage to be positioned either up or down.
- Four high-flow and one axial super high-flow low pressure ports on a swivel turret maximize hose routing options.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily.
- Available in 3364psi/232bar INT.
- Weight: INT 232 (oz/g): 16.8/475. DIN: 350g/12.3oz
- Airflow at 2900psi/200bar: (I/min/SCFM): >8500/301.
- Intermediate pressure (psi/bar): 133-142/9.2-9.8.

S620 X-Ti Second Stage

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Rugged reinforced technopolymer case and titanium faceplate look good and are able to withstand years of aggressive diving.
- Titanium barrel is rugged, anti-corrosion and lightweight for long-term reliability.
- Diaphragm fits inside a more compact casing for maximum breathing sensitivity.
- User controls include an easy-grip diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA) lever.
- Exhaust tee increases performance while directing bubbles out of the field of view.
- Compact Hi-Flow mouthpiece is mounted on an enlarged mouthpiece pipe to improve airflow as well as mouth
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Specific matching colors (blue, pink, yellow, purple, white and orange) on mouthpiece and hose protector are available as an accessory.
- Airflow at 2900psi/200bar: 1850 l/m 66 SCFM.
- Weight: 5.9oz/168g.
- Includes a zippered fabric bag complete with specially fitted padding to protect the regulator during storage and transport.

SCUBAPRO teams its high performance first stage with the air-balanced S620Ti second stage. The MK25 EVO offers excellent resistance to freezing, superb inhalation sensitivity and instant delivery of air on demand. The S620 Ti embraces the best features of SCUBAPRO's renowned S600 in an upgraded, state-of-the-art design. Smaller and lighter than the S600 but using the same-sized diaphragm, the S620 Ti delivers excellent performance; work of breathing has been reduced by 37% over the S600, providing effortless airflow under all dive conditions. The full titanium inlet tube is ultralight, the large purge cover improves water circulation, and the exhaust tee increases performance while directing bubbles out of the field of view. In all water temperatures, in all dive conditions, this regulator system is a winner.

MK25 EVO/S620 TI CARBON BT **60TH ANNIVERSARY EDITION**

WHILE SUPPLIES LAST

SCUBAPRO celebrates its 60th anniversary as a dive industry innovator with an iconic limited-edition regulator, the MK25 EVO/S620 Ti Carbon BT 60th Anniversary Edition. The 60th Anniversary Edition MK25 EVO first stage features a special Black Tech, DLC-based coating that provides a shiny, deep black finish with higher scratch and oxidation resistance. The protective end cap includes a distinctive "60 Year Anniversary" print in red. The spring, which can be seen through the compensation chamber holes, features the same red color. The 60th Anniversary S620 Ti second stage features a titanium barrel, with the knob ring and barrel nut also made of titanium like on the premium S620 X-Ti. There's a handmade carbon fiber part fitted on the front cover, plus red "60 Year Anniversary" prints can be found on the casing that match the red accents on the first stage. This special limited-edition regulator comes in a FSC-certified wooden box engraved with both SCUBAPRO and 60th Anniversary logos. The box's dark gray color highlights its wood texture as well as the logos. A black anodized laser engraved aluminum tag carrying the progressive serial number matching the regulator is also included, highlighting the exclusivity of this limited-edition regulator for collectors.

The MK25 EVO/S620 Ti Carbon BT 60th Anniversary Edition performs just as brilliantly as the standard MK25 EVO/ S620 Ti, but with enhanced comfort due to the lightweight titanium and carbon fiber parts on the second stage. Airflow is excellent, the Venturi is always easy to control thanks to the VIVA switch, the large purge cover improves water circulation, and the exhaust tee increases performance while directing bubbles out of the field of view. The MK25 EVO/S620 Ti Carbon BT 60th Anniversary Edition is CE certified according to the latest EN250A European Standards for all diving conditions, including extreme cold water.

12.620.650	DIN 300	2,200.00

For compact comfortable breathing performance in cold or silty water, the MK17 EVO 2/S620 Ti regulator system simply can't be beat. The MK17 EVO 2 is more compact and lighter weight than its MK17 EVO predecessor and the MK19 EVO with a new forged body, dry chamber with a twin spring layout for increased reliability and compactness. The S620 Ti embraces the best features of SCUBAPRO's renowned S600 in an upgraded, state-of-the-art design. Smaller and lighter than the S600 but using the same-sized diaphragm, the S620 Ti delivers excellent performance providing effortless airflow under all dive conditions. The full titanium inlet tube is ultra- light, the large purge cover improves water circulation, and the exhaust tee increases performance while directing bubbles out of the field of view.

MK17 EVO 2 First Stage

- New design allows it to be substantially smaller and lighter than the MK17 EVO and the MK19 EVO.
- Design is based on a forged brass body and a dry chamber with a twin spring layout for compactness and reliability.
- Sealed balanced diaphragm design makes for the ultimate compact first stage for cold water or contaminated diving conditions.
- Air-balanced diaphragm delivers consistent and effortless airflow, regardless of depth, tank pressure, or breathing
- Dry chamber is completely environmentally sealed with a dual diaphragm system that keeps out contaminated water. The rib is designed to enhance heat exchange, making the first stage cold water-proof.
- Two opposing high-pressure ports positioned on a 15º angle allow the first stage to be positioned either up or down, plus provide an optimal hose/transmitter layout.
- Due to the high-pressure port positioning, a transmitter adapter is not needed.
- Weight (oz/g): INT 232, 27/797; DIN 300, 20/572
- Intermediate pressure (3336 psi/ 230 bar): 133-142 / 9.2-9.8

S620 Ti Second Stage

- · Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Rugged reinforced technopolymer case and front cover are able to withstand years of aggressive diving.
- Titanium barrel is rugged, anti-corrosion and lightweight for long-term reliability.
- Diaphragm fits inside a more compact casing for maximum breathing sensitivity.
- User controls include an easy-grip diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA) lever.
- Exhaust tee increases performance while directing bubbles out of the field of view.
- Compact Hi-Flow mouthpiece improves airflow as well as mouth comfort, fitting all mouth sizes, from largest to smallest.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Specific matching colors (blue, pink, yellow, purple, white and orange) on mouthpiece and hose protector are available as an accessory.
- Weight (without mouthpiece): 6.3oz/179g.

MK19 EVO BT/G260 CARBON BT

G-SERIES

12.719.600

This premium regulator system features SCUBAPRO's flagship balanced diaphragm first stage, the MK19 EVO, finished in a special ultra-durable Black Tech coating, along with an upgraded version of SCUBAPRO's most popular tech diving second stage, the G260. While retaining its large diaphragm, internal metal components and high-flow exhaust valve for excellent breathing sensitivity and resistance to freezing, the G260 Carbon BT ratchets up its ruggedness and durability with the addition of a carbon fiber front cover. Lightweight and extremely durable, if dropped or struck against a hard object, carbon fiber can resist substantial shocks without damage. Both first and second stages feature the Black Tech DLC (Diamond-Like Carbon) coating on their metal parts. This unique coating not only lends a technical look to the system, it also protects against scratches and the ravages of salt water and corrosion. (A DLC coating is considered the highest quality PVD coating since it is the most durable and the hardest to scratch.) The MK19 EVO BT/G260 Carbon BT is a rugged, reliable, and sharplooking regulator system that delivers solid breathing performance in all diving conditions and water temperatures.

An upgrade to our popular G260 technical diving system, the MK25 EVO BT/G260 Carbon BT regulator system delivers superior durability with a carbon fiber cover and Black Tech finish. The balanced piston MK25 EVO BT offers excellent resistance to freezing, superb inhalation sensitivity and instant delivery of air on demand. The G260 Carbon BT, with its large diaphragm, internal metal components and high-flow exhaust valve for excellent breathing sensitivity and resistance to freezing, ratchets up its ruggedness with the addition of a carbon fiber front cover. Lightweight and extremely durable, carbon fiber can resist substantial shocks without damage. Both first and second stages feature a Black Tech scratchresistant coating on metal parts that protects against the ravages of salt water and corrosion. Also included is a zippered fabric bag complete with specially fitted padding to protect the regulator during storage and transport.

MK25 EVO/G260

G-SERIES

Offering effortless air delivery and outstanding reliability, this is the go-to air delivery system for cold water or technical diving. There's no better example of solid first stage performance in all water temperatures than the MK25 EVO. Teamed with the venerable G260, this system can be relied upon to deliver top-of-the-line performance in the most extreme conditions.

The MK19 EVO/G260 is purpose-built for technical diving as well as cave diving. The MK19 EVO offers an environmentally sealed system that is extremely resistant to freezing plus prevents water and pollutants from fouling its inner mechanism, along with a dry ambient pressure chamber equipped with a double spring and a LP port swivel turret to maximize hose routing options. Teamed with the G260, with its metal internal components, high-flow exhaust valve, diving controls and reversible hose attachment, you've got a top-performing regulator system for the most extreme conditions.

With the MK17 EVO 2/C370 you have a compact and lightweight regulator system ready to explore dive locales all over the world. The MK17 EVO 2 is more compact and lighter weight than its MK17 EVO predecessor and the MK19 EVO, thanks to a new forged body, dry chamber with a twin spring layout for increased reliability and compactness. Small but powerful when it comes to air delivery, the C370 offers convenient user controls include a diver-adjustable inhalation effort knob, a coaxial dive/pre-dive lever and a large, easy-to-activate purge button. The MK17 EVO2/C370 is the regulator system of choice for any dive bag and any recreational dive scenario.

MK17 EVO 2 First Stage

- New design allows it to be substantially smaller and lighter than the MK17 EVO and the MK19 EVO.
- Design is based on a forged brass body and a dry chamber with a twin spring layout for compactness and reliability.
- Sealed balanced diaphragm design makes for the ultimate compact first stage for cold water or contaminated diving conditions.
- Air-balanced diaphragm delivers consistent and effortless airflow, regardless of depth, tank pressure, or breathing
- Dry chamber is completely environmentally sealed with a dual diaphragm system that keeps out contaminated water. The rib is designed to enhance heat exchange, making the first stage cold water-proof.
- Two opposing high-pressure ports positioned on a 15º angle allow the first stage to be positioned either up or down, plus provide an optimal hose/transmitter layout.
- Due to the high-pressure port positioning, a transmitter adapter is not needed.
- Weight (oz/g): INT 232, 27/797; DIN 300, 20/572
- Intermediate pressure (3336 psi/ 230 bar): 133-142/ 9.2-9.8

C370 Second Stage

- Air-balanced valve smoothes out the inhalation effort at varving depths and supply pressures.
- Compact, rugged fiberglass-reinforced nylon casing takes up little space in a dive bag.
- Stainless steel frame on the front cover adds the SCUBAPRO C-Series signature.
- Poppet and lever allows the design to maintain the same overall size as the C350.
- Exhaust tee contributes to better work of breathing (a 10% improvement over the C350).
- User controls include a diver-adjustable inhalation effort knob and coaxial dive/pre-dive lever.
- Large purge button is easy to activate, even wearing thick gloves.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Compact Hi-Flow mouthpiece improves airflow as well as mouth comfort, fitting all mouth sizes, from smallest to largest.
- Weight (without mouthpiece): 6oz/171g.

MK11 EVO/C370

C-SERIES

The MK11 EVO/C370 is made for new divers, travel divers and avid recreational divers looking for a compact regulator system that delivers top performance and reliability. The new balanced diaphragm MK11 EVO is more compact than its MK11 predecessor, with a forged brass body, thermal fins and protective plastic bumpers to ward off scratches. It features an innovative double spring layout that contributes to overall compactness while improving reliability. The two HP ports are set on a 15-degree angle for more comfortable hose routing, and the four LP ports are all high-flow. The compact C370 is small but mighty when it comes to air delivery. Its convenient user controls include a diver-adjustable inhalation effort knob, a coaxial dive/pre-dive lever and a large, easy-to-activate purge button. The MK11 EVO/C370 is a dependable, go-anywhere air delivery system that makes diving fun, wherever your travels take you.

WHILE SUPPLIES LAST

12.177.300

The S270 is available with a MK11 first stage for divers seeking an air-balanced diaphragm design delivering effortless airflow unaffected by depth, tank pressure or breathing rate. It comes with a dive/predive switch, an effective purge, and a compact exhaust tee that minimizes exhalation effort.

ITEM		PRICES
Part Number	Description	MRP
12.177.000	INT 232	605.00
12.177.300	DIN 300	605.00

Recreational divers looking for solid performance in a regulator system are going to love the MK 11 EVO/S270. The new balanced diaphragm MK11 EVO first stage is more compact than its MK11 predecessor, with a forged brass body, thermal fins and protective plastic bumpers to ward off scratches. It features an innovative double spring layout that contributes to overall compactness while improving reliability. The MK11 EVO's two HP ports are set on a 15-degree angle for more comfortable hose routing, and the four LP ports are all high-flow. The S270 second stage features an air-balanced design whose compact casing and internal aerodynamics produce extremely low work of breathing. Delivering smooth breathing performance in a bulletproof anti-scratch design, the S270 comes with a dive/predive switch, an effective purge, and a compact exhaust tee that minimizes exhalation effort. CE certified for all diving conditions including cold water, this compact reg combination is a must-have addition to any dive bag.

MK11 EVO First Stage

- New air-balanced diaphragm design is more compact while delivering better performance than its MK11 predecessor.
- New forged brass body comes with metal fins to improve thermal exchange plus plastic bumpers to prevent scratching.
- Two new high-pressure ports are set on a 15-degree angle for convenient hose routing.
- Four new high-flow low pressure ports increase airflow while maximizing hose routing options.
- Innovative double spring layout increases performance while contributing to overall compactness.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- CE certified to EN250A European Standards for all diving conditions, including extreme cold water.
- Weight (oz/g): INT 232, 26.3/746; DIN 300, 18.6/528
- Intermediate pressure (3336 psi/ 230 bar): 133 142/9.2 - 9.8

S270 Second Stage

- •Air-balanced valve smooths out the inhalation effort when diving at varying depths and supply pressures.
- Technopolymer plastic barrel with a metal thread and a balanced valve helps save weight and provides a surface that ice crystals can't grab onto when diving in extreme
- Dive/predive switch is easy to use even wearing thick gloves.
- More compact, lighter weight and better breathing performance than its \$560 predecessor.
- Lightweight casing, made of a fiberglass-reinforced nylon core and a special PU outer layer, is extremely durable plus helps reduce jaw fatigue and improve diving comfort.
- The exhaust tee is compact and very efficient in minimizing exhalation effort.
- Compact Hi-Flow mouthpiece is comfortable, made with FDA-approved silicone, and features a large cross-section to maximize airflow.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- CE certified to the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Well-suited for diving classes, rental and professional accounts due to its bulletproof construction and solid breathing performance.
- Weight (without mouthpiece): 5.1oz/145g.

ITEM		PRICES
Part Number	Description	MRP
12.179.000	INT 232	605.00
12.179.300	DIN 300	605.00

The new MK11 EVO/R105 is a simple, rugged and reliable air delivery system. The MK11 EVO is a balanced diaphragm first stage with a forged brass body fitted with thermal fins and protective plastic bumpers to ward off scratches. More compact than its MK11 predecessor, it features an innovative double spring layout that contributes to its smaller size while improving reliability. The MK11 EVO's two HP ports are set on a 15-degree angle for more comfortable hose routing, and the four LP ports are all high-flow. The R105 delivers smooth, dependable air flow and is built to last. The compact casing features an anti-scratch front cover. Inside, a classic downstream valve design and metal valve housing increase overall reliability. Included is a dive/pre-dive VIVA switch to control free flows, a soft, co-molded purge button for easy purging, and a choice of left or right hose routing.

MK11 EVO First Stage

- New air-balanced diaphragm design is more compact while delivering better performance than its MK11 predecessor.
- New forged brass body comes with metal fins to improve thermal exchange plus plastic bumpers to prevent scratching.
- Two new high pressure ports are set on a 15-degree angle for convenient hose routing.
- Four new high-flow low pressure ports increase airflow while maximizing hose routing options.
- Innovative double spring layout increases performance while contributing to overall compactness.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- CE certified to EN250A European Standards for all diving conditions, including extreme cold water.
- Weight (oz/g): INT 232, 26.3/746; DIN 300, 18.6/528
- Intermediate pressure (3336 psi/ 230 bar): 133 142/9.2 - 9.8

R105 Second Stage

- Classic downstream valve comes with a dive/pre-dive VIVA switch to control free flows.
- Metal valve housing is built rugged and increases overall
- Reversible hose attachment makes it easy to use for side mount, pony or deco tanks.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Compact Hi-Flow mouthpiece improves airflow as well as mouth comfort, fitting all mouth sizes, from largest to
- Weight (without mouthpiece): 5.5oz/156 g.

MRP	526.00
Part Number	Description
12.105.000	INT 232

Simple and reliable, the MK2 EVO/R105 is the regulator system of choice for diving schools, rental centers and new divers, as well as avid recreational divers looking for a basic backup breathing system. It offers smooth dependable air delivery and is built to last. The compact casing is based on the S620 Ti with an anti-scratch front cover and a metal classic downstream valve design. Included is a dive/pre-dive VIVA switch plus a soft, co-molded purge button for easy purging, and left or right hose routing for use on stage or pony bottles. Teamed with SCUBAPRO's classic MK2 EVO, the only downstream piston-style first stage with internal components specifically designed to resist freezing in extreme cold-water conditions, this new regulator combo is durable, reliable and affordable.

MK2 EV0/S270

S-SERIES

12.127.000

Recreational divers looking for solid performance in a regulator system and ready to step up from their entry-level systems are going to love the MK2 EVO/S270. The S270 second stage features an air-balanced design that's patterned after the popular S620 Ti, whose compact casing and internal aerodynamics produce extremely low work of breathing. Designed to last in tough conditions, a fiberglass-reinforced nylon core combined with a PU outer layer result in a bulletproof antiscratch casing. In addition to breathing performance, the S270 offers an effective purge and a dive/predive switch that's easy to use even wearing thick gloves. The exhaust tee is compact and efficient in minimizing exhalation effort. Teamed with SCUBAPRO's classic MK2 EVO, the only downstream piston-style first stage with internal components specifically designed to resist freezing in extreme cold-water conditions, this regulator combo is affordable and durable while delivering smooth and reliable breathing performance. In addition to recreational divers, the MK2 EVO/S270 is a great choice for rental, training and professional divers seeking solid performance from a durable regulator system.

MK2 EVO/R195

R-SERIES

It's the perfect go-anywhere regulator for divers who like to keep their diving simple and affordable. The MK2 EVO is the only downstream piston-style first stage with internal components specifically designed to resist freezing in extreme cold-water conditions. When teamed with the R195, this regulator system is reliable, easy to maintain, easy to use, and with its left or right hose routing capability, it's also the perfect system for use on stage or pony bottles.

MK25 EVO FIRST STAGE

MK19 EVO FIRST STAGE

10.713.010 INT

10.713.030 DIN

MK25 EVO First Stage

- Air balanced flow-through piston in a chrome-plated marine grade brass body provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate.
- Patented XTIS (Extended Thermal Insulating System) fully insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme coldwater conditions without compromising breathing performance. Key insulation system components are visible in blue.
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures.
- Two opposing high pressure ports allow the first stage to be positioned either up or down.
- Five high-flow and one axial super high-flow low pressure ports on a swivel turret maximize hose routing options.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and
- Weight (oz/g): INT 232, 27.9/790; DIN 300, 20.1/572.
- Intermediate pressure (psi/bar): 133-142/9.2-9.8.

10.719.010 INT

10.719.030 DIN

MK19 EVO First Stage

- Designed to be the ultimate first stage for cold water or contaminated diving conditions.
- New design makes it substantially smaller and lighter than the original MK19.
- Air-balanced diaphragm delivers constant and effortless airflow unaffected by depth, tank pressure, or breathing rate.
- Environmentally sealed system prevents water and pollutants from fouling the inner mechanism and is extremely resistant to freezing.
- Dry chamber is equipped with a double spring, making it more compact and reliable.
- Two opposing high pressure ports allow the first stage to be positioned either up or down, plus provide for the optimum hose/transmitter layout.
- Swivel turret comes with four High-Flow LP ports plus one axial Super High-Flow LP port to maximize hose routing options for technical diving layouts.
- Compact size, light weight and superb breathing performance continue in the best SCUBAPRO regulator tradition.
- Ideal first stage for recreational, technical, professional and military divers.
- Weight (oz/g): INT 232, 31.2/885; DIN 300, 23.5/665.
- Intermediate pressure (psi/bar): 133-142/9.2-9.8.

MK17 EVO 2 First Stage

- New design allows it to be substantially smaller and lighter than the MK17 EVO and the MK19 EVO.
- Design is based on a forged brass body and a dry chamber with a twin spring layout for compactness and reliability.
- Sealed balanced diaphragm design makes for the ultimate compact first stage for cold water or contaminated diving conditions.
- Air-balanced diaphragm delivers consistent and effortless airflow, regardless of depth, tank pressure, or breathing rate.
- Dry chamber is completely environmentally sealed with a dual diaphragm system that keeps out contaminated water. The rib is designed to enhance heat exchange, making the first stage cold water-proof.
- Two opposing high-pressure ports positioned on a 15º angle allow the first stage to be positioned either up or down, plus provide an optimal hose/transmitter layout.
- Due to the high-pressure port positioning, a transmitter adapter is not needed.
- Weight (oz/g): INT 232, 27/797; DIN 300, 20/572
- Intermediate pressure (3336 psi/ 230 bar): 133-142/ 9.2-9.8

MK17 EVO First Stage

- · Air balanced diaphragm delivers constant and effortless airflow unaffected by depth, tank pressure, or breathing rate.
- Environmentally sealed system prevents water and pollutants from fouling the inner mechanism.
- Dry ambient pressure chamber increases freezing resistance, ensuring consistent airflow in the coldest conditions.
- Substantial increase in airflow over its predecessor -- 6900 I/min versus 6500 I/min -- includes improved balance of air supply pressure.
- Two high pressure and four high-flow ports maximize air delivery.
- Weight (oz/g): INT 232, 30.3/860; DIN 300, 22.6/640.
- Intermediate pressure (psi/bar): 133-142/9.2-9.8.

MK2 EVO First Stage

- · Classic downstream piston design features a chrome-plated marine grade brass body with one high pressure and four low pressure ports.
- Patented XTIS (Extended Thermal Insulating System) fully isolates the mechanical elements from the cold, increasing freezing resistance by an average of 50% over its predecessor without compromising breathing performance.
- · Additional internal technical improvements include a spring insulating bushing and coating, an insulating piston bushing, an insulating sleeve and an antifreeze cap, all of which contribute to freezing resistance. (Key insulation system components are visible in blue.)
- Chrome-plated brass body is 3.5mm smaller than its predecessor but houses an oversized piston by 1.6mm that provides better breathing performance by increasing airflow by 15%.
- Stainless steel removable orifice allows for easier maintenance while extending regulator life.
- Meets EN250-2014 standards for cold-water breathing performance.
- Weight (oz/g): INT 232, 23.6/670; DIN 300, 15.9/450.
- Intermediate pressure (psi/bar): 138-145/9.5-10.

S270

S620 Ti Second Stage

- · Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Rugged reinforced technopolymer case and front cover are able to withstand years of aggressive diving.
- Titanium barrel is rugged, anti-corrosion and lightweight for long-term reliability.
- Diaphragm fits inside a more compact casing for maximum breathing sensitivity.
- User controls include an easy-grip diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA) lever.
- Exhaust tee increases performance while directing bubbles out of the field of view.
- Compact Hi-Flow mouthpiece improves airflow as well as mouth comfort, fitting all mouth sizes, from largest to smallest.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Specific matching colors (blue, pink, yellow, purple, white and orange) on mouthpiece and hose protector are available as an accessory.
- Weight (without mouthpiece): 6.3oz/179g.

S270 Second Stage

- Air-balanced valve smoothes out the inhalation effort when diving at varying depths and supply pressures.
- Technopolymer plastic barrel with a metal thread and a balanced valve helps save weight and provides a surface that ice crystals can't grab onto when diving in extreme cold water.
- Dive/pre-dive switch is easy to use, even wearing thick gloves.
- Lightweight casing, made of a fiberglass-reinforced nylon core and a special PU outer layer, is extremely durable plus helps reduce jaw fatigue and improve diving comfort
- The exhaust tee is compact and very efficient in minimizing exhalation effort.
- Compact Hi-Flow mouthpiece is comfortable, made with FDA-approved silicone, and features a large crosssection to maximize airflow.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- CE certified to the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Well-suited for diving classes, rental and professional accounts due to its bulletproof construction and solid breathing performance.
- Weight (without mouthpiece): 5.1oz/145g.

S600

A700

S600 Second Stage

- Air-balanced valve smoothes out the inhalation effort when diving at varying depths and supply pressures.
- Metal valve housing is able to withstand years of aggressive diving.
- User controls include a diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA) dive/ pre-dive switch.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow.
- Weight (without mouthpiece): 7.1oz/200g.
- Changeable purge covers allow you to make your regulator truly unique.

A700 Second Stage

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Rugged full metal case, front cover and valve housing (barrel) are able to withstand years of aggressive diving.
- Metal construction enables the use of a larger diaphragm inside a compact casing, increasing breathing sensitivity.
- User controls include a diver-adjustable inhalation effort knob and coaxial-flow Venturi-Initiated Vacuum Assist (VIVA) lever.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow.
- Weight (without mouthpiece) 9.2oz/261g.

G260

G260 Second Stage

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Rugged reinforced technopolymer design features SCUBAPRO's largest second stage casing and diaphragm for the ultimate in breathing sensitivity, regardless of position in the water.
- Anodized aluminum front cover ring increases durability without adding weight.
- Metal components increase resistance to freezing when diving in extreme conditions.
- High-flow exhaust valve reduces exhalation for better overall breathing comfort.
- A diver-adjustable inhalation effort knob finetunes air delivery to suit changing depths, water conditions and personal tastes.
- Venturi-Initiated Vacuum Assist (VIVA) dive/predive switch prevents free flows in cold water or when used as an octopus.
- Reversible hose attachment allows you to easily adjust hose routing for tech diving configurations.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow.
- Weight (without mouthpiece): 9.5oz/268g.

C370

C370 Second Stage

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Compact, rugged fiberglass-reinforced nylon casing takes up little space in a dive bag.
- Stainless steel frame on the front cover adds the SCUBAPRO C-Series signature.
- Poppet and lever allows the design to maintain the same overall size as the C350.
- Exhaust tee contributes to better work of breathing (a 10% improvement over the C350).
- User controls include a diver-adjustable inhalation effort knob and coaxial dive/pre-dive lever.
- Large purge button is easy to activate, even wearing thick gloves.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Compact Hi-Flow mouthpiece improves airflow as well as mouth comfort, fitting all mouth sizes, from smallest to largest.
- Weight (without mouthpiece): 6oz/171g.

GALILEO 3

The Galileo 3 (G3) is SCUBAPRO's premium watch-style dive computer, combining a sleek design and color display with a classic timepiece look. The G3's vibrant, high-contrast full-color display offers easy readability and a backlight for excellent visibility in all conditions. Utilizing Galileo's trusted menu design and four button control, it's extremely intuitive to navigate through dive modes, two algorithm choices, screen styles and other personalized dive management options. Powered by a rechargeable lithium battery and built to last with a stainless steel housing, the G3 delivers everything you need in a dive computer with the comfort and style of an everyday wristwatch.

Depth, Dive Time, Max Depth and No Stop Time (Left to Right)

Surface Interval

Depth, Dive Time, Heart Rate,
No Stop Time (Left to Right)

Compass

Depth, Dive Time, Temperature, No Stop Time (Left to Right)

- Modern watch-style dive computer with a classic timepiece look.
- Vibrant high-contrast full-color display and backlight provide excellent readability in all conditions.
- Robust stainless steel housing for diving up to 300 meters/984 ft. in Gauge mode. Ergonomic design features rounded case back and edges making it comfortable to wear.
- Stainless steel rotatable timing bezel features selfluminescent digits and markers to increase visibility in lowlight conditions. In Gauge mode, the bezel can be used to set and track your dive time.
- Intuitive Galileo full text menu design and four button controls make it easy to navigate through the system.
 Menu available in 6 languages: English, Spanish, French, German, Italian and Dutch.
- Choice of 2 selectable algorithms: Predictive Multi-Gas Bühlmann ZHL-16 ADT MB PMG or ZHL-16 GF (Gradient Factors).
- 3 dive modes: Scuba, Gauge & Apnea. In Scuba mode, four settings available: Trimix, CCR, Sidemount & PMG.
- Pair up to 8 nitrox/trimix tanks (PMG) plus a diluent tank in CCR and a pony bottle to handle any recreational or technical diving scenario.
- Sport mode offers a swim stroke counter, activity counter (pedometer) and stopwatch for topside sports.
- Wireless air integration monitors tank pressure plus provides true remaining bottom time (RBT) and allows air consumption to be factored into the decompression calculation.

- Personalized dive management functions include PDIS (Profile Dependent Intermediate Stops) which calculates an intermediate stop based on N2 loading, current and previous dives and breathing mixes for safer diving. Also, Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.
- Optional Heart Rate Monitoring (sold separately) lets you track your heart rate while diving or when engaged in topside sports. While diving, your heart rate and skin temperature can be factored into the workload of the adaptive algorithm to help make your dive safer and more enjoyable.
- Choice of screen display configurations lets you customize your data presentation with Light or Classic screen options to suit your individual diving style.
- 3D digital tilt-compensated compass features a top view full compass rose display.
- Smart notifications such as emails, texts, media player controls and alerts when paired with a compatible iPhone
- Bluetooth Low Energy interface lets you download dives to any iOS or Android device or PC/Mac.
- Firmware can be user-updated with LogTrak 2.0 iOS or Android app.
- Built to last with a TFT LCD display, sapphire glass lens, and a stainless steel housing.
- Rechargeable lithium battery provides up to 30 hours per charge depending on dive and watch settings being utilized.
- Comfortable 22mm black silicone strap included. Interchangeable accessory bands are available.

LUNA 2.0 AIR INTEGRATED (AI)

The SCUBAPRO Luna 2.0 Al is a sleek, intuitive air-integrated dive computer loaded with easy-to-use features. Its wireless air integration feature enables you to monitor tank pressure easily, plus provides true remaining bottom time (RBT) and allows your air consumption to be factored into the decompression calculation. Designed to be one of the thinnest dive computers, the Luna 2.0 Al offers an oil-filled plastic housing for reliable performance and comfort. Its large modern widescreen features a high contrast black/white LCD display and large characters for easy reading at depth. A simple two-button interface lets you navigate the system with ease, aided by clearly marked screen prompts. You get a choice of ADT and GF algorithms, plus 100% nitrox compatibility and three selectable gasses for open circuit diving. Three dive modes are available – Scuba, Apnea and Gauge, along with PDIS and six selectable Microbubble levels. The Luna 2.0 Al also offers an optional integrated heart rate monitor that lets you visually track your heart rate and skin temperature to help ensure you stay in your individual target zone to maximize fun and safety at depth.

05.200.101- Air Integrated SMART+ PRO Transmitter and HRM Sold Separately see pg. 42

- Easy-to-use design is great for new divers and casual recreational divers.
- Air-integration monitors tank pressure and provides true remaining bottom time (RBT) calculations based on the workload from breathing.
- Optional heart rate monitor (sold separately) records heartbeat and skin temperature that can be factored into the decompression calculation along with workload.
- Oil-filled thermoplastic housing is super thin and sits comfortably on the arm.
- Wide, high-contrast black and white LCD and Dot Matrix display screen and large characters for easy reading at depth.
- Intuitive menu and two button controls make it easy to navigate through the system.
- Choice of 2 algorithms: Predictive Multi-Gas Bühlmann ZH-L16 ADT MB, or ZH-L16 + GF (Gradient Factor).
- Nitrox compatible (100%) with 3 selectable gasses.
- PDIS (Profile Dependent Intermediate Stops) calculates an intermediate stop based on N2 loading, current and previous dives, and breathing mixes for safer diving.

- Six Microbubble levels (LO-L5) let you personalize and adjust the level of conservatism in the ADT algorithm to match your experience level, age and physical conditioning.
- 3 Dive modes: Scuba, Gauge, and Apnea.
- New soft silicone arm strap is comfortable against your wrist.
- Durable silicone housing case cover & pre-installed screen protector.
- Max Operating Depth: 394ft/120m.
- Bluetooth Low Energy interface lets you download dives to any iOS or Android device or PC/Mac.
- Firmware can be user-updated by going to scubapro.com or the SCUBAPRO LogTRAK 2.0 app.
- Battery is rated for up to two years/300 dives and is dealer-changeable.
- Bungee mounts on the corners of the housing allow for alternate securing methods (Bungee sold separately).

GALILEO HUD HANDS-FREE DIVE COMPUTER

Constant, Easy to View Dive Data Right in Front of You. There's Simply Nothing Like It.

SCUBAPRO's GALILEO HUD is a revolutionary mask-mounted, hands free dive computer with a virtual, floating heads-up display. The innovative Galileo HUD dive computer displays easily viewable, critical dive information right in front of you, so you never have to look away in order to view your dive data. Constant dive data visibility provides a sense of control while allowing you to remain fully immersed in your surroundings.

Niver View

HANDS-FREE DATA MONITORING: Super-convenient for photographers and tech divers who are often engaged in underwater activities that require both hands. Also, since you don't have to raise an arm or reach for a console to check your dive data, the Galileo HUD allows a more streamlined profile moving through the water.

SINGLE-KNOB USER CONTROL: When it's time to change screens or make adjustments, the Galileo HUD features an intuitive push-wheel that allows you to access functions with one hand. To operate the push-wheel, simply rotate it to navigate up and down within a menu, or increase or decrease a user setting.

FLIP-UP HINGE: The Galileo HUD offers a convenient Flip-Up feature, reminiscence of military night vision goggles, that enables you to tilt the HUD display up and out of the way. When it's time to resume data monitoring. simply tilt the display back down into position and you're ready to track your dive.

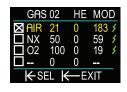

Standard Dive Display

05.110.101

GAS

LITE DIVE DISPLAY

MAIN MENU

NAVIGATION

"FLOATING" DISPLAY: The Galileo HUD's micro OLED screen is designed to be mounted on a diving mask in close proximity to the human eye. Using precision near-eye optics, this "floating" display creates a screen image that appears at a virtual distance of approximately 3ft/1m, which allows divers to keep their eyes on both their dive data and the underwater scenery at the same time.

COMPATIBILITY: The Galileo HUD is compatible with a variety of SCUBAPRO masks, including the Spectra, Spectra Mini, Zoom (special mask holder), Synergy Twin, Synergy 2 Twin, Scout and Flux Twin. The D-Mask has a special holder delivered with the mask. The Frameless mask is available with an integrated HUD holder.

Zoom Mask HUD Mount Adapter on all Black Zoom Mask. All Sold Separately 24.157.012-mask 24.157.200-adapter

D-Mask HUD Mount Adapter shown w/o HUD and with HUD on Black/Blue D-Mask. Mask and HUD Sold Separately 24.250.XX0- mask & adapter

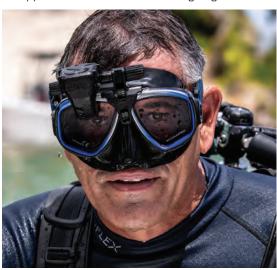

Included with HUD: · LED Transmitter · Mask Mount · Zip Ties · Read First · Ouick Card · USB Charging Cable · Protection Foil · Plastic Ball for Mounting Mask ·Lanyard 05.110.100 Manual is available online.

GALILEO HUD SPORT

FEATURES:

- Lightweight (near neutrally buoyant) and easily mountable to a dual-lens mask.
- Full-color OLED 96x64p display produces vibrant colors for maximum readability in any ambient light conditions.
- Choice of 2 algorithms: Predictive Multi-Gas
 Bühlmann ZH-L16 ADT MB PMG or ZH-L16 Gradient Factors.
- PMG algorithm offers Microbubble levels and Profile Dependent Intermediate Stops (PDIS).
- Selectable dive modes: SCUBA, Gauge, Apnea and CCR.
- Trimix and Nitrox compatible, with advanced CCR functionality.
- Up to 8 selectable gases in SCUBA mode and 2 set points for CCR diving.
- Compatible with the SCUBAPRO Smart transmitter for wireless tank pressure monitoring.
- Provides true remaining bottom time (RBT) based on the workload from breathing.
- 3D full-tilt digital compass facilitates navigating under water in addition to built-in GPS for surface navigation that lets you store 3 pre-programmed headings.
- Maximum operating depth: 394ft/120m.
- Rechargeable battery provides up to 20 hours of dive time per charge.

- 2GB memory stores 10,000 hours of diving.
- Download data via Bluetooth or USB cable. Compatible with Apple and Android devices using LogTRAK.

GALILEO HUD PRO (MILITARY & SAR)

Designed for the military along with police and various other search and rescue teams, the hands-free Galileo HUD PRO offers the same "floating" display, hands-free data monitoring, flip-up hinge and single-knob user control as the HUD SPORT, as well as all of the innovative features of the HUD SPORT. However, the HUD PRO takes it a step further with extended software that provides an additional mode with even more functions – called the "Navy Mode."

Navy mode is designed specifically for combat swimmer operations. It is similar to Gauge mode in that it will not carry out decompression calculations. It differs from Gauge mode primarily in its mode of operation, its color settings and its screens.

FEATURES:

- In addition to a range of OLED brightness settings, the Navy Mode provides a variety of colors to choose from: blue, green, red, white, yellow and pink. By choosing the correct color and OLED brightness you can manage the light emitting from the HUD PRO's screen.
- The HUD PRO also offers a Manual activation setting. When set to Manual, a press-and-release of the push-wheel is required to turn the unit on. This feature enables you to avoid any unexpected or unwanted light emissions from the screen when entering the water.

Navy Mode provides the HUD PRO with three additional screens:

- 1. Main screen Depth, total dive time, leg timer*.
- 2. **Secondary screen** Leg timer*, depth, compass heading, GPS waypoint.
- 3. Auxiliary screen Local time, max depth, water temp, battery voltage.

^{*} Leg time works like a stopwatch, displaying Min:Sec.

G2 WRIST & CONSOLE (GALILEO 2)

Will all of its features, the G2 has become a favorite computer for divers of all skill levels – from beginner to tech diver. Ease of use, multiple screen options, and the ability to utilize much or as little technology as you want makes this the most versatile computer SCUBAPRO has to offer. From SCUBA to freediving, CCR to sidemount, new diver to tech diver – the G2 is designed to go anywhere your passion for diving takes you!

G2 WRIST & G2 CONSOLE:

- MENU STRUCTURE: Same intuitive menu structure, simple 3-button control system and diver-friendly functions that make the Galileo so easy to use. Enables a seamless transition from the Galileo to the G2 or G2 Console.
- MENU LISTINGS: Customizable menu listings let you use as much or as little of the G2 technology as you need - your choice.
- FULL COLOR DISPLAY: Full-Color TFT (Thin-Film Transistor) dot matrix display LCD screen (320x240p) produces vibrant colors for maximum readability to quickly direct your attention to what you need to know. TFT screens use less energy and are more efficient than other screen types to help extend battery life.
- DISPLAY CONFIGURATIONS: Choice of screen display configurations includes Light, Classic, Full and Graphical screen options to suit your individual diving style.
- LANGUAGES: Multiple language choices include more than 19 languages.
- ALGORITHM: Predictive Multi-Gas ZHL-16 ADT MB algorithm programs up to 8 nitrox/trimix mixes to handle any recreational or technical diving scenario. Algorithm also offers a series of Microbubble levels and incorporates Profile Dependent Intermediate Stops. Maximum operating depth: 394ft/120m for reliable data computing regardless of diving situation.
- AIR INTEGRATION: Air integration monitors tank pressure plus provides true remaining bottom time (RBT) and allows air consumption to be factored into the decompression calculation.
- BATTERY: Rechargeable battery provides up to 50 hours of dive time per charge.

Please check our website scubapro.com to download the latest firmware updates.

BLUE LIGHT screen
shown

O5.081.111
GREEN LIGHT screen shown

- COMPASS: Full tilt digital compass is the best available and includes a half-compass rose and bearing memory.
- MEMORY: Huge 485MB memory stores pictures, tables, tissue loading status and 1,000 hours of dive profiles.
- COLOR OPTIONS: Choose between 4 screen color options: Black, blue, green & white.
- DOWNLOAD DATA: USB cable or Bluetooth Low Energy interface lets you easily download dive data to your phone or handheld device. Or, download dive data to a PC/Mac using LogTRAK software.
- HUMAN FACTOR DIVING: Integrated heart rate monitor lets you visually track your heart rate and skin temperature to ensure you stay in your individual target zone to maximize fun and safety at depth. (MOD 197ft/60m) HRM & Skin Temp is exclusive to SCUBAPRO. Compatible with the G2 Wrist model with Heart Rate Belt 05.060.020.

G2 WRIST (GALILEO 2)

- Curved ergonomic low-profile shape sits comfortably on the arm and resists rotating (integrated bungee mounts are provided for tech divers). Can also be used on a retractor.
- Wireless air integration provides support for up to 9 transmitters when all features are activated.
- Multiple dive modes. Scuba, Freediving, Gauge, CCR, Trimix and Sidemount for total in-water versatility. (Freediving, Trimix, CCR and Sidemount modes are disabled from the factory. Activation is easy- no downloading or upgrading is required.)
- Special freediving logbook stores repetitive dives sequentially under the same freediving session.

G2 TEK (GF ONLY)

The G2 TEK is designed specifically for technical divers. While offering all of the easy-to-use features of the highly versatile G2 wrist computer, including wireless air integration, heart rate and skin temperature monitors, a full-tilt digital compass and full-color display, the G2 TEK replaces the Predictive Multi-Gas ZHL-16 ADT MB algorithm of the G2 with the GF PURE algorithm. The Algorithm includes the ability to set Gradient Factors for increased conservatism. The technical diving community, in particular, finds that the Gradient Factors approach best suits their diving needs. In addition, the G2 TEK comes with bungee straps, also preferred by many tech divers in place of the traditional wrist strap, and a blue bezel to differentiate it from the standard G2.

Includes wrist and bungee straps SMART+ PRO Transmitter Sold Separately 05.080.201

SMART+ PRO TRANSMITTER

Enjoy the convenience of air integration without the hassle of a dangling hose. This new low-profile Smart transmitter greatly improves communication reliability and works with SCUBAPRO's most advanced dive computers. It screws into a high pressure port on your first stage and relays tank pressure and true remaining bottom time (RBT) to the computer screen. The latest version features a built-in LED located at the top of the cap that gives you an estimate of tank pressure when the first stage is attached to a tank. This lets you know if the tank has gas without needing to activate the computer.

PRICE	
MRP	315.00
Part Number	Description
05.055.040	Smart+ PRO Transmitter

- Easy to use, you only need to pair it to your computer once – the first time you use it.
- Coded transmission technology prevents interference between different dive computers.
- · Compact size.
- Better HP hose routing.
- Powered by a user-replaceable CR 2PE/BN 0 lithium battery that's good for two years or 250 to 300 hours of diving, whichever comes first.
- Durable locking mechanism for easy no screw access to battery compartment.

More visible LED Indicator Status:

- 1,450 psi/100 bar and over = Slow Short Blinking Green light.
- Between 1,450 psi/100 bar and 725 psi/50 bar = Short Double Blinking Yellow Light.
- Below 725 psi/50 bar = Long Single Blink Red Light.
- Compatible with the HUD, G3, G2, G2 Tek, Luna 2.0 Al, A2, M2, & Sol personal dive computers.

DIGITAL HEART RATE MONITOR

Factoring your heart rate into your decompression calculations helps make diving safer and a lot more fun. A lightweight waterproof transmitter is clipped onto the elastic belt that straps around the chest, directly against the skin. This belt wirelessly transmits your heart rate data to your SCUBAPRO personal dive computer. Data is displayed on the screen, plus is factored into your decompression calculations to create a more personalized dive plan and improve the quality of your diving.

- More comfortable to wear with soft strap.
- Easy to use, just strap it on and enjoy the benefits of biometrics.
- More reliable digital HR signal provides a patented skin temperature measurement. Both skin temperature data and heart rate data are factored into your decompression algorithm, making diving safer and more enjoyable.
- · Compact design saves space in your dive bag.

- Convenient clip can be added and removed from the elastic belt so it can be rinsed and dried fully post-diving. (A)
- Powered by a user replaceable CR2032 type battery, that lasts for around 50 dive hours or 1 year.
- Heart Rate Belt has an operation depth of 120 meters / 394 feet
- Compatible with SCUBAPRO HUD, Luna 2.0 Al, G3, G2 Wrist, G2 Tek and A2 dive computers.

Part Number	Description	MRP
05.060.020	Heart Rate Belt	140.00
05.060.025	HR Belt Soft Strap (Replacement)	OPT

The A2 is designed for advanced divers and technical divers who appreciate the compactness and convenience of a wrist-style dive computer, but demand the kind of features and functions that enable them to excel in their sport.

- Targeted to advanced recreational divers and technical divers as well as CCR divers and freedivers.
- Smart technology wireless airintegration can handle multiple transmitters.
- Air-integration monitors tank pressure and provides true remaining bottom time (RBT) calculations based on the workload from breathing. Transmitter sold separately.
- Heart rate monitor records
 heartbeat and skin temperature
 (with SCUBAPRO HRM Belt only; sold
 separately) that can be factored into
 the decompression calculation along
 with workload.
- Digital tilt-compensated 3D compass allows for easy navigation.
- Predictive Multi-Gas ZH-L16 ADT MB algorithm accommodates eight gases (21-100% 02) plus two in CCR mode.
- PDIS (Profile Dependent Intermediate Stops) calculates an intermediate stop based on N2 loading, current and previous dives and breathing mixes for safer diving.
- Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.
- Multiple Dive modes: Scuba, Gauge, Apnea, Trimix, Sidemount, CCR.
- Scuba & Gauge mode offer two display versions while diving: Light or Classic.
- Sport mode offers sport-related functions like a swim stroke counter, activity counter (pedometer) and stopwatch.

PLUS:

- Modern design with full functionality is perfect for topside time-keeping as well as underwater data tracking.
- High-resolution hybrid matrix display with large numbers is easy to read under water, even in adverse conditions.
- Lightweight design is so comfortable on the wrist you won't want to take it off
- Intuitive menu and four button controls make it easy to navigate through the system.
- Max Operating Depth: 394ft/120m.
- Bluetooth Low Energy interface lets you download dives to any iOS or Android device or PC/Mac.
- Firmware can be user-updated by going to scubapro.com.
- CR2450 battery is rated for up to two years/300 dives.

Gas Mix

The A1 is a single gas nitrox dive computer designed for new divers and casual recreational divers looking for a simple yet versatile wrist-style computer that can be worn on the surface as well as under water. The A1 offers full time-keeping functions, and three Dive modes plus a Sport mode. An intuitive menu system and clearly marked button controls make it easy to access and understand all functions. Offering just the right balance of topside features, underwater functions and ease of use, the A1 will quickly become an integral part of not just your diving life, but of your everyday life as well.

22MM ARM STRAPS

COLORED SILICONE STRAPS

These durable silicone straps include metal IP-coated buckles and are comfortable on the wrist. Easy to change out (just remove two Torx screws), now you can color coordinate your Galileo 3 and Aladin dive computer with the rest of your dive gear. Straps are compatible with G3, A1 and A2 dive computers only.

05.064.005

05.064.006

05.064.007

Upgrade your Galileo 3, Aladin A1 or A2 dive computers with a heavy-duty NATO nylon wrist strap. Simple to use, the durable one-piece strap is 13.8in/35cm in length to fit around the bulkiest wetsuit or drysuit arm. It adjusts easily and keeps your computer safe and secure.

05.064.020

PVD-COATED METAL STRAP

This eye-catching metal wrist band will transform your hardworking dive computer into an attractive timepiece for onshore work and play. The PVD-coated exterior finish helps provide corrosion and some scratch resistance. Each wrist band contains 17 stainless steel links plus a metal clasp. Compatible with Galileo 3, A1 and A2 dive computers.

SCUBAPRO ALADIN H (MATRIX)

With its compact size and intuitive data display, the SCUBAPRO Aladin H (Matrix) is a sharp-looking and full-featured dive computer targeted to avid recreational divers looking for a convenient air-integrated DC. Featuring a metallic faceplate and easy-to-read segmented display on top and middle rows, and a matrix display on the bottom row, the SCUBAPRO Aladin H's (Matrix) full air integration eliminates the need to carry a separate submersible pressure gauge. Add the on-board digital compass and you have an ultra-compact, full-function, hose-attached dive computer.

- Predictive Multi-Gas ZH-L16 ADT MB algorithm accommodates three gases (21-100% 02).
- Fully air-integrated, the algorithm calculates remaining bottom time (RBT) and estimates workload based on breathing rate.
- PDIS (Profile Dependent Intermediate Stops) calculates an intermediate stop based on N2 loading, current and previous dives and breathing mixes for safer diving.
- Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.
- Protector boot covers a quick-release fitting that enables you to separate
 the dive computer from the HP hose for easy post-dive data downloading,
 traveling, and safe storage.

- Two Dive modes: Scuba, Gauge.
- Maximum operating depth: 394ft/120m.
- Altimeter.
- Digital compass, displayed on matrix bottom row.
- Active back light.
- Saltwater and freshwater settings.
- Visual and audible alarms.
- Adjustable ppO2 from 1.0 and 1.6, and it can be set to off.
- Bookmark function.
- Lens protection cap.
- CR2450 user-replaceable battery rated for two years/300 dives.

- SCUBAPRO has tested and recommends the use of the following dongle: Bluegiga BLED112.
- Dive logs can be stored and analyzed with a PC/Mac via new Bluetooth technology 4.0 technology.
- Using the Bluetooth Low Energy (Bluetooth 4.0) feature divers can download their dives to iOS and Android devices that handle the Bluetooth Low Energy technology.
- For PCs and Macs that are not equipped with built-in Bluetooth Low Energy technology, the end user will have to buy a Bluetooth Low Energy USB dongle which is available on the market.

SCUBAPRO ALADIN SPORT (MATRIX)

Featuring a metallic silver faceplate and easy-to-read display, the SCUBAPRO Aladin SPORT (Matrix) is targeted to divers who want multi-gas functions as well as to recreational divers who appreciate a dive computer with the kind of features that enable them to evolve in their sport. The computer screen features an easy-to-read segmented display on the top and middle rows, plus an eye pleasing matrix display on the bottom row where you'll also find an easy-to-use on board digital compass. Available as a wrist mount or as a capsule in a two gauge console.

- Predictive Multi-Gas ZH-L16 ADT MB algorithm accommodates three gases (21-100% O2).
- PDIS (Profile Dependent Intermediate Stops) calculates an intermediate stop based on N2 loading, current and previous dives and breathing mixes for safer diving.
- Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.

PLUS:

- Three Dive modes: Scuba, Freediving and Gauge.
- Maximum operating depth: 394ft/120m.
- Altimeter.
- Saltwater and freshwater settings.
- Digital compass, displayed on matrix bottom row.
- Active back light.
- Visual and audible alarms.
- Adjustable ppO2 from 1.0 and 1.6, and it can be set to off.
- Bookmark function.
- Lens protection cap.
- CR2450 user-replaceable battery rated for two years/300 dives.

- SCUBAPRO has tested and recommends the use of the following dongle: Bluegiga BLED112.
- Dive logs can be stored and analyzed via new Bluetooth 4.0 technology.
- For PCs and Macs that are not equipped with builtin Bluetooth Low Energy technology, the end user will have to buy a Bluetooth Low Energy USB dongle which is available on the market.
- Using the Bluetooth Low Energy (Bluetooth 4.0) feature divers can download their dives to iOS and Android devices that are compatible with the Bluetooth Low Energy technology.

SCUBAPRO ALADIN ONE MATRIX available for rental and/or retail

An ideal dive computer for diving schools and rental stations, the compact, single mode Aladin ONE Matrix is simple to use, easy to understand, and delivers reliable dive data for enjoyable recreational diving. The essence of simplicity, this is an ideal computer for new divers, and a great backup once you're ready to move up to more advanced dive computing. It's available as a wrist mount or a capsule as part of a two- or three-gauge console.

- Screen features a LCD segmented display on the top and middle rows, plus an eye-pleasing matrix display on the bottom row (the same as Aladin SPORT Matrix).
- Menu structure allows for easy navigation through the system.
- 16 tissue compartments ZH-L16 algorithm accommodates one gas with Nitrox capability of 21-50% in 1% increments.
- Bluetooth Low Energy interface for easy data transfer.

DIGITAL 330M

Although targeted primarily to technical divers, the Digital 330M is an ideal data delivery system for beginning divers, and a useful backup instrument for any diver. Whatever your skill level, the Digital 330M can be counted on to provide outstanding electronic accuracy in all diving conditions.

- Incorporating state-ofthe-art technology, a bevy of information is provided in a compact information center.
- Data includes current and maximum depth, ascent speed, dive time in minutes and temperature.
- Auto on/off feature means it's always ready to dive after a quick self-test.
- Variable ascent rates are displayed in a percentage and with a fast ascent warning.

- Depth-rated to 1082ft/ 330m to suit all technical deep-diving scenarios.
- Surface interval is displayed for 24 hours for safety and convenience.
- Logbook provides data for the last 20 dives to allow for post-dive review and analysis.
- Provides automatic altitude compensation when changing dive locations.

METAL PRESSURE GAUGE (Compact Metal Case PG)

Compact, all-metal analog pressure gauge. This dual psi/bar model is ideal for traveling divers and resorts with an international clientele.

- Compact pressure gauge (0-6000psi) and (0-400bar).
- Dual gauge displays imperial and metric units simultaneously.
- Red zone displays at 0-800psi and 0-50bar.
- Ø 2.1in/48mm with brass case.

PRICE	
MRP	175.00
Part Number	Description
05.023.132	Dual bar/psi

2-GAUGE SP CONSOLE + COMPASS

(Metal Compact PG, FS-2 Compass)

Featuring a metal compact pressure gauge with an easy-to-read FS-2 compass, this console combination is ideal for the traveling diver who uses a non-air integrated computer or who likes to carry a sophisticated backup. The dual pressure gauge shows imperial and metric units simultaneously.

- Compact pressure gauge (0-6000 psi) and (0-400 bar).
- Red zone displays at (0-800psi) and (0-50bar).
- Ø 2.1in /48 mm brass case.
- FS-2 oil-filled compass offers a 35-degree tilt for easy viewing.

FS-2 COMPASS

The FS-2 compass provides a unique tilt angle of up to 35 degrees, making it easier to read and operate in almost any position. With a floating magnet separate from the compass rose, the FS-2 has greater operating freedom than conventional compasses. This means you can use the same compass for both Northern and Southern hemispheres, making it the perfect navigation instrument for traveling divers.

- Scratch-resistant and durable oil-filled polycarbonate case.
- Highly luminous dial for easy reference in low light conditions.
- Side view window for easy and accurate navigation.

HYDROS PRO

The HYDROS PRO is a true breakthrough in dive comfort and convenience. The moldable Monprene®, adjustable fit and multi-attachment points combine to make this the most customizable and comfortable BCD ever. Known for its award-winning product design, the HYDROS PRO is an incredible feat of SCUBAPRO engineering, built for anyone who loves to dive. Interchangeable straps, a packable design and an included backpack with room for your entire dive kit make the HYDROS PRO perfect for any destination and any dive.

Detailed Product Features

- Ultra Durable: Patented Injection molded Monprene® Gel Harness is extremely resistant to UV, chemicals and abrasion. The fabric-free harness uses no hook-and-loop fasteners or zippers.
- Instant Dry: Ideal for travel due to less water retention and lower post-dive weight.
- "BCD-4-Life" Modular Design: Customizable to add/ remove weight systems, straps and pouches. Extended life-span due to simplified repairs. Virtually every component, including buckles, can be replaced without stitching.
- 3D Ergonomic Design: Conforms to your body shape for maximum comfort.
- Lightweight: Advanced materials keep weight low.
- Neutrally Buoyant: Near-Zero inherent buoyancy requires less lead, resulting in better buoyancy control and much more enjoyable diving.
- Body Grip Gel: Prevents BCD from shifting and riding up.
- Dual-Compound Backplate: Provides the ultimate in stability and comfort. Single tank band system allows for easier assembly.
- Torso Flex Zone: Auto-adjusts to your torso length for excellent comfort and freedom of movement.

- Articulated Shoulder Straps: Allow straps to adjust to your body shape to achieve a snug fit.
- Kit-Up Assist: Holds shoulder straps open for easy donning.
- Cross-Flow Channel: Unrestricted internal airflow reduces air trapping for enhanced maneuverability and easy deflation at any angle.
- 2-Stage Inflation: Tri-bungee system controls air distribution to maintain a compact shape under water and high lift capacity at the surface.
- **Dorsal Weight-Wing:** Anti-abrasion and instant dry. Optimal "Outboard" trim pockets.
- Buckle Weight System: Simple, safe and reliable quickrelease buckles offer a fixed location for easy one-hand operation.
- Multi-Mount Accessory Matrix: Multiple D-Rings and mounting points for a knife + light + SMB + hoses + crotch strap and much more.
- Smart-Pack Design: Folding shoulder and waist straps pack into the wing, creating an unbelievably compact package for easy transport and storage.

The HYDROS X is a front-adjustable BCD that offers fully injection molded Monprene® thermoplastic shoulders and back pad. This unique feature allows the shoulders to conform to your body like a tailored fit, creating superior comfort. Add the full-sized backpack and stainless steel Super Cinch tank band and you also get excellent stability both on the surface and at depth. The bladder, made out of EndurTex high-tenacity nylon fabric, is extremely lightweight and durable while offering generous lift capacity, aided by lower back bellows. In the event of damage, several components on the HYDROS X are detachable and easily replaceable. Its flat-buckled quick-release integrated weight system and rear trim weight pockets work together to offer a more comfortable and balanced position during your dive. The two big zippered cargo pockets offer great gear-carrying capacity and are easily accessible even when the weight pouches are fully loaded. Two stainless steel D-rings provide clip-on points for additional gear. In addition, the HYDROS X features a Multi-Mount Accessory Matrix with multiple D-Rings and mounting points that easily attach various dive accessories.

- HYDROS X is based on the same modular Monprene® shoulders and back pad design popularized by the HYDROS PRO back-inflation BCD.
- EndurTex high-tenacity 420 nylon fabric bladder is lightweight yet extremely durable.
- Monprene® thermoplastic shoulders and back pad are extremely resistant to UV, chemicals and abrasion, plus don't absorb water to minimize drying time.
- Rotating quick-release shoulder buckles allow you to route your shoulder straps to optimize fit.
- Super Cinch tank buckle system locks the tank in solid for maximum stability at depth.
- Integrated front weight system is based on the same Monprene® pockets found on the HYDROS PRO.

- Two big zippered cargo pockets offer great gear-carrying capacity and are easily accessible even when the weight pouches are fully loaded.
- Two stainless steel D-rings provide clip-on points for additional gear.
- Includes Multi-Mount Accessory Matrix with multiple D-rings and mounting points that easily attach various dive accessories.
- Color kits are available. See page 60.
- Offered in 4 sizes for men (S, M, L, XL) and 3 sizes for women (XS/S, M, L).
- Buoyant lift ranges from 29.2lbs to 44.9lbs for men, and 29.2lbs to 38.2lbs for women, depending on size.

Y-Fit Shoulder Design

Large Zippered Cargo Pockets

Improved Integrated Weight System

For detailed size information, please refer to the Glide Sizing Guide.

Restyled in 2023, the Glide is a full-featured, front-adjustable BCD designed to maximize ease of use, fit and performance. This year's model offers new larger cargo pockets, a new integrated weight system design, upgraded backpack padding and a striking new blue color scheme. Among the features carried over is the Super Cinch tank buckle system and the Glide's innovative Y-Fit shoulder design that adapts to the body better to allow for excellent control and range of motion for arms. A stainless-steel triangular ring manages the forces in the Y's center, balancing pressure over the body and keeping the harness under control for the ultimate in comfort at depth and on the surface. The dump system includes three newgeneration valves that allow you to deflate the wraparound bladder in any swimming position.

- Backpack padding design is smaller to decrease unwanted buoyancy.
- Bigger zippered cargo pockets hold more easy-access dive accessories.
- Integrated weight system places weight pockets over the cargo pockets, making it easier to manage both cargo and lead.
- Constructed of light weight 420 denier nylon for longlasting durability.
- Wraparound air bladder retains its cradle-like shape even when fully inflated.
- Y-Fit shoulders with a triangular stainless-steel ring balance the pressure on the body to maximize fit and comfort.

- Soft neoprene neck optimizes comfort.
- Adjustable cummerbund compensates for suit compression, ensuring a snug fit at varying depths.
- Super Cinch tank buckle system locks the tank in solid for maximum stability at depth.
- Two rear trim pouches allow you to achieve a wellbalanced swimming position.
- Four large pre-bent stainless-steel D-rings, along with two smaller stainless D-rings, provide lots of clip-on points for additional gear.

Y-Fit Shoulder Design

Large Zippered Cargo Pockets

Improved Integrated Weight System

The Bella is designed and tailored for female divers who prefer the comfort and security of a full-featured, front-adjustable BCD. Restyled in 2023, the Bella features new larger cargo pockets, a new integrated weight system design, upgraded backpack padding and a striking white color scheme. Loaded with convenience and performance features, the Bella's exclusive wraparound bladder retains its cradle-like shape even when fully inflated, providing a comfortable fit and stable position both at depth and on the surface. It also sports a Y-Fit shoulder design that fits the female body better, allowing for excellent control and increased range of motion for the arms. A stainless-steel triangular ring manages the forces in the Y's center, balancing pressure over the body and keeping the harness under control, regardless of your position in the water. This makes for a comfortable and secure ride while cruising the depths.

- Backpack padding design is smaller to decrease unwanted buoyancy.
- Bigger zippered cargo pockets hold more easy-access dive accessories.
- Integrated weight system places weight pockets over the cargo pockets, making it easier to manage both cargo and lead.
- White color scheme looks stylish.
- Designed and sized for women divers.
- Constructed of light weight 420 denier nylon for longlasting durability.
- Wraparound air bladder retains its cradle-like shape even when fully inflated.

- Y-Fit shoulders with a triangular stainless-steel ring balance the pressure on the body to maximize female fit and comfort.
- Soft neoprene neck optimizes comfort.
- Adjustable cummerbund compensates for suit compression, ensuring a snug fit at varying depths.
- Super Cinch tank buckle system locks the tank in solid for maximum stability at depth.
- Two rear trim pouches allow you to achieve a well-balanced swimming position.
- Four large pre-bent stainless-steel D-rings, along with two smaller stainless D-rings, provide lots of clip-on points for additional gear.

WHILE SUPPLIES LAST

The Classic, aptly named as it is one of diving's most famous and timeless BCDs, combines the best design and construction features of past and present. It is built tough, generously equipped with high-quality hardware, armed with a first-class valve system and offers both impressive buoyant lift and excellent stability. One look at the Classic and you'll understand how it got its name, and why it enjoys such a stellar reputation.

- Constructed of puncture-resistant, polyurethane-coated 420 denier nylon with RF welding.
- Super Cinch tank buckle system locks the tank in rocksolid for maximum stability at depth.
- Fully adjustable cummerbund compensates for suit compression.
- Heavy-duty waist overstrap with stainless steel cam buckle provides additional security.
- Fast-drying padded backpack enhances comfort during long dives.
- Quick-release integrated weight pouches ditch quickly and easily and secure with squeeze buckles.
- Rear trim pouches allow you to achieve a well-balanced swimming position.
- Two large hook-and-loop fastener pockets with knife attachment grommets, plus two additional zippered pockets, provide lots of cargo-carrying capability.
- Four large pre-bent stainless steel D-rings, along with two smaller stainless D-rings, provide clip-on points for additional gear.

21.771.X00 21.772.X00 Front

The Navigator Lite, SCUBAPRO's new lightweight, back inflation BCD, is perfect for the recreational travel diver who prefers black-flotation in a simple, yet durable form with the added benefit of showing off interesting color combinations. Similar in weight to the current Litehawk BCD, the new Navigator Lite is built around an Airnet® soft backpack, making it light, foldable, and travel-friendly. The design is both modular and heavy-duty, with durable components that are easily replaceable if needed. The Navigator Lite also offers a new feature that no other SCUBAPRO BCD has - replaceable air cell covers that come in a choice of six color options for color-customizing your dive gear. It is required that an authorized SCUBAPRO technician install the air cell covers. The air cell is made of durable 420D nylon with high frequency welds, delivering generous lift capacity despite its compactness. The BCD comes with an easy-adjust Quick Cinch tank buckle system that's teamed with a 50mm hook & loop tank strap. Together they deliver rock-solid tank stabilization in all dive conditions. The cummerbund features two detachable pockets, each with two soft D-rings. These pockets can be either placed with the opening facing upwards for carrying accessories or downwards to provide quick-release ballast. The Navigator Lite comes in two expandable sizes, XXS to M and M to XXL, with a bit of overlapping so you can be sure to find the perfect fit for your next dive travel adventure.

- Unique air cell covers come in three standard colors installed on the BCD (Black, Blue, and Coral), and three additional accessory colors (Navy Blue Camo, Army Green, and White).
- Perfect for recreational travel divers who prefer backflotation and enjoy color-customizing their dive gear.
- Padded Airnet® soft backpack is foldable for easy packing and convenient storage.
- Modular design is fully adjustable and allows for the easy replacement of back padding, cummerbund, shoulder straps, tank cinches, air cell and pockets in case of damage or wear.
- Air cell is made of durable 420D nylon with high frequency welds and generous lift capacity, with three flat bungee straps to maintain a streamlined profile.

- Narrow straps with loops on shoulder pads provide multiple attachment points for accessories.
- Cummerbund features two detachable pockets, each with two soft D-rings. Pockets can be placed with the opening facing upwards (for carrying accessories) or downwards (providing quick-releasing ballast).
- Two 8mm stainless-steel grommets on each pocket lid provide a convenient mount for a SCUBAPRO knife.
- Quick Cinch tank buckle is teamed with a 50mm hook & loop tank strap for stabilization. Two rubber inserts guarantee optimal tank retention in all conditions.
- Ergonomic shoulder pads and cummerbunds come in two expandable sizes, XXS to M and M to XXL, with a bit of overlapping to ensure a snug fit.
- Available with either a BPI or AIR2.

WHILE SUPPLIES LAST

The Seahawk 2 is an all-purpose BCD that features an ergonomic shoulder design with rotating buckles and a soft, reinforced backpack – this makes the Seahawk 2 much lighter than its predecessor, and extremely easy to fold and pack. The stainless steel Super Cinch tank band is positioned low and is supported by an additional hook-and-loop fastener strap to secure the tank when diving. Other features include a 50mm waist strap with lightweight cam buckle, generous cargo pockets and modern airway and valve fittings. Offering a streamlined shape yet substantial buoyant lift when needed, the Seahawk 2 is the perfect choice for divers looking for freedom of movement, comfort and stability when cruising the depths.

- Ergonomic shoulder design with rotating buckles improves fit, helps distribute the load and enhances stability.
- Reinforced soft backpack with high-grip tank patch and inner padding add to comfort, reduce overall weight, and make it easy to fold and pack.
- Super Cinch stainless steel tank band system is positioned low and teamed with a second hook-andloop fastener strap to secure the tank for transport and diving.
- 50mm waist strap with lightweight plastic buckle lets you fine-tune adjustments for a perfect fit.
- Two large zippered pockets provide lots of cargocarrying capability.

- Constructed of 1000 denier nylon and 420 denier nylon for maximum durability.
- High-quality air cell offers a streamlined shape when deflated and substantial buoyant lift when inflated.
- Soft neoprene neck roll and padded back pad enhance comfort during long dives.
- Quick-release integrated weight pouches secure with low-profile buckles.
- Two rear trim pouches help create a comfortable swimming position.
- Six stainless steel 40mm D-rings, plus two additional 25mm D-rings on the pockets, provide lots of clip-on points for additional gear and instrumentation.

If you like to bring your own gear with you when you go dive-trekking, the SCUBAPRO GO is the BCD for you. A true travel BCD, the GO is lightweight and foldable yet is loaded with features like integrated front weight pockets, two huge quick-draining cargo pockets, two octo pockets and SCUBAPRO's user-friendly Quick Cinch tank buckle system. This innovative, patented tank strap assembly adjusts easily and will fit any tank size in case you find yourself renting different tanks at different dive destinations. Compact rotating shoulder buckles make it easy to don the BCD as well as dial in the perfect fit. Airnet padded backpack is water-draining, easy to fold, and enhances comfort during long dives.

- Patented Quick Cinch tank buckle requires minimal effort to buckle and easily adjusts to fit any tank size. (A)
- Additional upper band helps secure the tank for maximum stability at depth. (B)
- Lightweight design (only 5.7lbs/2.6kg in size Large) folds easily and doesn't take much room in your travel bag. (C)
- Two large low profile zippered pockets, one fitted with stainless steel knife attachment grommets, provide lots of cargo-carrying capability.
- Quick-release integrated weight pouches ditch easily and secure with low-profile squeeze buckles. Each weight pouch can hold up to 10lbs/4.5kg of ballast weight.
- Rotating quick-release shoulder buckles allow you to optimize the routing of your shoulder straps to maximize comfort and fit.
- Five aluminum D-rings, including two large, pre-bent D-rings on the shoulder pads, provide convenient clip-on points for additional gear.
- Two octopus pockets are provided for storing octopus and console hoses.
- Constructed of 210 denier nylon covered with polyurethane and RF soldered for maximum wear resistance.

A fresh design incorporating eye-catching silver, blue and white graphics, a bold SCUBAPRO logo make the Level stand out in any diving crowd. But beyond good looks, this front-adjustable BCD brings together all of the performance and comfort features you'll need for any recreational diving scenario. The bladder, made of EndurTex high-tenacity 420 nylon fabric, is lightweight yet extremely rugged, and it's designed to comfortably wrap around your body without squeeze. Rotating

quick-release shoulder buckles allow you to optimize the routing of your shoulder straps for comfort, and a sternum strap and adjustable cummerbund with double-pull over-strap make for the perfect fit. The full-sized backpack, working together with SCUBAPRO's Super Cinch tank band, holds the tank rock solid for maximum stability. The integrated weight system loads easy and ditches even easier with its low-profile 40mm flat buckles. Built-in trim weight pockets help distribute ballast weight and help ensure a comfortable swimming attitude while at depth. Also included are two large cargo pockets, one with metal grommets for attaching a knife, four D-rings for clipping on additional gear, and two octo pockets for storing safe second and console hoses.

- Graphics & color accents combine for an eye-catching new look. (A)
- Built-in trim weight pockets can each hold up to 4.4lbs/2kg of weight to help maintain a well-balanced dive position. (B)
- Rotating quick-release shoulder buckles allow you to optimize the routing of shoulder straps to maximize comfort and fit. (C)
- Super Cinch tank buckle system locks the tank in solid for maximum stability at depth.
- EndurTex high-tenacity 420 nylon fabric bladder is lightweight, extremely durable, and dries fast.

- Quick-release integrated weight pouches each hold up to 11lbs/5kg of ballast and feature high-security 40mm flat buckles.
- Sternum strap and cummerbund with over-strap provide plenty of adjustment to achieve that perfect fit.
- Two large pockets with hook-and-loop closures provide lots of cargo-carrying capacity, plus one is fitted with metal grommets for attaching a knife.
- Four stainless steel D-rings, three pre-bent, provide lots of clip-on points for additional gear.
- A pair of octo pockets are perfect for storing safe second and console hoses.

SCUBAPRO's Litehawk is the ultimate back-flotation travel BCD. Its lightweight, ultra-slimmed-down design and soft, flexible backpack lay flat and compact for packing. The adjustable belt-style waist strap with nylon buckle can be cinched up snug, hugging your body like it was custom made for you while delivering a comfortable, stable position at depth.

- Compact, lightweight design with soft backpack is perfect for dive travel.
- Constructed of 420 denier nylon for lightness and longlasting durability.
- Low-profile, progressively-shaped rear air cell increases range of motion while decreasing drag.
- Elastic cords rein in the air cell when partially inflated and help control deflation.
- Looser webbing loops on the right shoulder improve ease of access.
- Clutter-free ergonomic harness eliminates bulk and enhances freedom of movement.
- Rotating quick-release buckles optimize the routing of the padded shoulder straps to maximize fit.
- Tank band and strap system keeps tank secure and increases stability at depth.
- Three-dump deflation system lets you dump air from a variety of underwater positions.

- Adjustable belt-style waist strap with nylon buckle offers a snug fit for any body shape.
- Two basic accessory pockets are included.
- Two rear trim pouches allow you to achieve a wellbalanced swimming position.
- Four aluminum D-rings provide convenient clip-on points for additional gear.
- Colors and logo on the back pad deliver a fresh look.
- Compatible with the S-Tek Pro Fluid Form Weight System.

21.224.010	One Size

21.224.010

For detailed size information, please refer to the Rebel Sizing Guide.

Specially designed for smaller divers, the front-adjustable Rebel is built tough to last. Its wraparound bladder provides a stable and secure ride at depth, and the padded backpack provides a lot of additional comfort. A flexible, one-size-fits-all design, coupled with a choice of two sizes of comfortable cummerbunds, enables divers of various sizes to maintain a snug fit. The front integrated gravity weight pocket system loads easily through zippered top openings. Weights are held in place by lower-hook and-loop flaps backed by heavy-duty buckles. They release easily, especially when using SCUBAPRO's optional Rebel weight pouches with easy-grab handles.

- Front integrated gravity release weight pocket system loads and releases weights quickly and easily.
- Buckles on shoulder straps make adjusting the BCD easy as a diver's body changes, providing additional comfort.
- Optional weight pouches with easy-grab handles make quick work of handling ballast weight.
- Constructed of 420 denier nylon for lightweight durability.
- Padded backpack provides extra cushion when strapped to a tank.
- \bullet Standard web strap with lightweight buckle holds the tank securely.
- Two zippered cargo pockets and four plastic D-rings two large and two small are provided for carrying extra gear.
- SCUBAPRO's Balanced Power Inflator (BPI) and two dump valves provide pinpoint buoyancy control.

Convenient Size Adjustment

- Adjustable sternum strap and cummerbund contribute to a comfortable fit.
- Small and large cummerbunds are included so all smaller divers can achieve the best fit.

REBEL WEIGHT POCKET KIT

The Rebel Weight Pocket Kit is designed to fit into the Rebel's front integrated gravity weight pocket system. The kit includes two weight pouches that you insert into the Rebel's gravity weight pockets. Each weight pouch can hold up to 5.5lbs/2.5kg of ballast weight and features a convenient plastic handle so divers can quickly and easily remove the weight pouches when needed.

91.027.900	3XL (47"-51")

CURRENTS LARGE/SMALL VEST

This easy-to-use high-visibility yellow vest comes in two sizes - large and small - to accommodate all snorkelers. The high visibility yellow increases safety and fun by providing additional buoyancy support on the surface. The adjustable strap lets any sized snorkeler dial in a snug and comfortable fit.

DEFINITION DRY SUIT

Targeted to advanced divers looking for a quality mid-range fabric drysuit, the Definition Dry HD is a serious drysuit that's built to last. It is made with a heavy-duty poly/butyl/poly trilaminate blend plus a stitch-glue-double waterproof taped seam assembly that's able to withstand the rigors of diving. The Definition Dry's trilaminate fabric blend has also been certified as being fungus and bacteria resistant by an independent laboratory specializing in textile testing. This will help to extend the working life of the suit plus will radically reduce odors that occur from repeated use. Though built tough, the Definition Dry HD offers a number of design features that enable you to achieve a comfortable, streamlined fit.

- Heavy-duty poly/butyl/poly trilaminate design stands up to years of aggressive diving.
- Seams are stitched, glued, and then double waterproof taped for maximum reliability.
- Front diagonal BDM metal dry zipper keeps water out and makes self-donning easy.
- Latex wrist and neck seals are durable, comfortable and efficient at blocking water entry.
- Neoprene neck collar keeps the hood in place, making it easier to position the hood when wearing gloves, and helps preserve the latex neck seal
- Quality Si-Tech valves mounted on stitched and glued pads ensure efficient and trouble-free airflow control.
- Attached semi-rigid dive boots feature soft soles that improve their anti-slip capabilities while enabling you to comfortably walk on rough grounds
- Boots include hook & loop straps to improve fit while preventing air from traveling to feet. Also included: Heel cap with fins strap retainer.
- Two large cargo pockets equipped with D-rings, easyto-see blue bungee, high security over-flaps and hook & loop closures.
- I-Safe straps on both arms offer a secure mounting spot for wrist instruments.

- Trilaminate fabric blend has been independent laboratory tested and certified as fungus and bacterial resistant.
- Suspender system enhances fit and provides convenient lower suit support between dives.
- Hood features an air vent system and a hook for securing to the cargo pocket.
- Includes hood, carry bag, low pressure hose, repair kit, zipper wax and owners manual

The Evertech Dry Breathable is a premium trilaminate drysuit designed for avid divers and loaded with features. Built with a breathable fabric nylon/PU/nylon trilaminate blend, stitched and waterproof taped-twice seams, a diagonal front waterproof zipper, a Si-Tech ring seal system for wrists and neck and Si-Tech valves, this fabric suit is top quality throughout. A pair of large cargo pockets, lightweight attached boots and blue suspenders are just a few of the standard features included with a suit designed to keep you warm, dry and comfortable in all water conditions.

- Attached semi-rigid dive boots feature soft yet protective soles that improve their anti-slip capabilities while enabling you to comfortably walk on objects like shells.
- Boots include Velcro straps to improve fit while preventing air from traveling to feet. Also included: fin strap retainers.
- Breathable nylon/PU/nylon trilaminate design allows body perspiration evacuation, but keeps water out.
- Seams are stitched then waterproofed taped twice for maximum reliability.
- Neoprene neck collar keeps the hood in place, makes it easier to position the hood when wearing gloves, and helps protect the latex neck seal.
- Front diagonal BDM metal dry zipper keeps water out and makes self-donning easy and is

protected by an extra fabric flap with YKK Vision zipper.

- Si-Tech valves mounted on stitched and glued pads ensure efficient and trouble-free airflow control.
- Si-Tech ring system for latex wrist and neck seals provides quick replacement of damaged latex seals or the use of optional silicone seals.
- I-Safe straps on both arms offer a secure mounting spot for a wrist computer.
- Two large utility pockets are equipped with D-rings, easy-tosee blue bungee, high-security over-flaps and Velcro closures.
- A hook is provided on the rightthigh pocket for attaching a hood.
- Blue suspender system enhances fit and provides convenient lower suit support between dives.

The premium-plus Exodry offers a unique approach to drysuit design by fusing 4mm high-density neoprene with latex wrist and neck seals. This hybrid design is extremely effective, delivering minimal inherent buoyancy, maximum range of motion and an excellent sealing system. Features include protective shoulder and knee panels, a comfortable plush interior, blue suspenders, and much more. A pair of semi-rigid dive boots with fin strap retainers include Velcro straps to improve fit while preventing air from shifting when diving in the heads-down position. The Exodry is a smart choice for all types of diving and can be used with or without an undersuit.

- 4mm high-density neoprene resists compression so buoyancy variations are reduced at depth.
- Latex wrist and neck seals are thin yet durable and provide comfortable, watertight seals.
- Black plush interior is comfortable and enhances cold water protection.
- Neoprene collar covers the latex neck seal to eliminate cold spots and increase comfort.
- Shoulder and knee panels cover a lot of area for maximum antiabrasion protection.
- Heavy-duty abrasion-resistant fabric in the seat area adds to the suit's protection.
- Attached semi-rigid dive boots feature soft yet protective soles that improve their anti-slip capabilities while enabling you to comfortably walk on objects like shells.

- Boots include Velcro straps to improve fit while preventing air from traveling to feet. Also included: fin strap retainers.
- Heavy-duty rear shoulder-toshoulder BDM metal drysuit zipper is covered by a neoprene overflap for added protection.
- I-Safe straps on both arms offer secure mounting spots for wrist instruments.
- Blue suspender system enhances fit and provides convenient lower suit support between dives.
- Handy right-thigh utility pocket with D-ring, bungee and zippered closure provides a secure spot for carrying accessories.
- A hook is provided on the cargo pocket for attaching a hood.
- Si-Tech balanced side-activated inlet and adjustable outlet valves allow for pinpoint buoyancy control, increasing stability and control at depth.

PRICE

This premium-plus compressed neoprene drysuit offers the streamlined fit, comfort and flexibility of a wetsuit with the thermal properties and water-tightness of a drysuit. The dense 4mm neoprene resists compression at depth so the drysuit can be worn with a thin undergarment or no undergarment at all. Features include protective shoulder and knee panels, a comfortable plush interior, ultra-smooth wrist seals, blue suspenders, and much more. Built for comfort and extended wear, the Everdry 4 fits like a glove, offers excellent range of motion, and most importantly, keeps body heat in and cold water out.

- 4mm high-density neoprene weighs 50% less and is significantly softer than traditional drysuit neoprene.
- Seams are triple-glued and double-thread blind-stitched on the outside; inside they are coated with liquid polymer to create a long-lasting waterproof
- Black plush interior is comfortable and enhances cold water protection.
- Smooth-skin fold-under neoprene neck seal and ultrasmooth wrist seals provide comfortable, watertight sealing surfaces.
- Heavy-duty rear shoulder-toshoulder BDM metal drysuit zipper is covered by a neoprene overflap for added protection.
- Attached neoprene soft socks enable the suit to be turned

- completely inside-out for cleaning and drying.
- Neoprene soft socks can be worn inside heavy-duty drysuit boots or standard neoprene dive hoots
- Blue suspender system enhances fit and provides convenient lower suit support between dives.
- I-Safe straps on both arms offer secure mounting spots for wrist instruments.
- Handy right-thigh utility pocket with D-ring, bungee and zippered closure provides a secure spot for carrying accessories.
- A hook is provided on the cargo pocket for attaching a hood.
- · Si-Tech balanced side-activated inlet and adjustable outlet valves allow for pinpoint buoyancy control, increasing stability and control at depth.

SI-TECH TRIGON P-VALVE

Drysuit divers can increase their bottom times, reduce the possibility of dehydration and dramatically boost the comfort level during any dive, but especially during extended dives, by adding a Trigon P-valve, or "Pee valve," to their drysuits. The Trigon P-valve offers a balanced design that equalizes differences in pressure, eliminating unpleasant squeeze. Its machined housing is low-profile. With no buttons or moving parts to contend with, the Trigon P-valve provides effortless, hands-free relief for maximum comfort for the duration of your dive.

IMPORTANT: The Trigon P-Valve should be assembled and installed by
experienced dealers/drysuit technicians only - not by end users. Warranty
claims will not be accepted if assembly is not made accordingly.

 Low-profile exter 	nal housing (only 9mm)) prevents snagging on underwater
obstructions.		

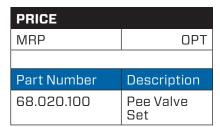

- No buttons or moving parts equals effortless, hands-free relief.
- Simple system is easy to clean and maintain.
- Fits all Si Tech valve ports and connects with both uridomes and the She-P.

• Kit includes:

Trigon P-valve, Internal valve port, Disassembly tool, On/off valve, O-ring, 50cm hose, Blanking plug, 2 - 30mm uridomes (25mm & 35mm uridomes are available as options)

OBERON DRY GLOVE SYSTEM FOR SLAGGO

The Släggö Flex Ring is a modular quick-change solution designed to make it easy to replace a broken or torn wrist seal on a drysuit. And now, with the Oberon Dry Glove system, there's a convenient and reliable method for attaching virtually any model of dry glove to a Släggö Flex Ring. Developed and manufactured by Si Tech, the Oberon Dry Glove System consists of 13 components per arm, connects to large and medium Släggö Flex Rings, and fits most common dry glove models.

Dry gloves not included. Designed to fit Evertech Dry Breathable.

For each arm, the system includes:

- Oberon Ring (with Lock and Release Ring, Rubber Ring and O-ring).
- Glove Ring.
- O-Rings (4 pcs).
- Red, green, blue and yellow Spanner Rings.
- Suit Ring requires no alignment 360° swiveling connection.
- Lock & Release Ring is made of rubber for maximum grip plus protects the O-ring from dust.
- Easy to mount and easy to use.
- Fits most common dry glove models.

K2 DRYSUIT UNDERGARMENTS

The undergarments of choice for drysuit diving, the K2 line keeps you warm while diving dry. Sporting a modern eyecatching design, these undergarments are available in two levels of thickness to suit a variety of thermal warmth requirements. They are patterned after the Everflex 1.5mm line and come in long sleeve tops, pants and steamer styles.

K2 Light:

- Light Grid plush material, 164g/m2 weight.
- Breathable, warm and stretchy.
- · Compatible with neoprene drysuits.
- Includes elastic wrist loops on tops and heel straps on pants.
- Can be worn under semi-dry and 7mm wetsuits.

K2 Mid-Weight:

- HD Plush material 629g/m2 (+/-5%) is breathable, warm and stretchy.
- Compatible with both trilaminate and neoprene drysuits.
- Pants and long sleeve tops can be worn separately or together.
- Elastic wrist loops and heel straps prevent ride-up when pulling on a drysuit.

K2 Extreme:

- Dual fleece material, 629g/m2 weight with compression panels of 919g/m2 weight.
- Breathable and stretchy, with maximum thermal protection.
- Compatible with trilaminate drysuits.
- Steamer design with compression protection padding on shoulders, chest and knees.
- Hip pockets with zippers.
- Elastic wrist loops and heel straps.
- Features a front double slider zipper.
- Holes on legs can be adapted to P valves.

NOVASCOTIA W/HOOD 7.5MM, SEMI-DRY

PRICE

Offering a snug-fitting, flexible dive suit with good thermal properties and minimal water intrusion, the NovaScotia semi-dry is the perfect solution for staying very warm and relatively dry while virtually eliminating hydrodrag, radically improving a diver's ability to move easily through the water. With its 7.5/6.5mm thickness, waterproof YKK Aquaseal Vislon zipper, improved plush lining to increase warmth and stretch, and a long list of convenience features, the NovaScotia is the diver's answer to a comfortable, affordable semi-dry suit. Positioned between a traditional wetsuit and a neoprene drysuit, the NovaScotia delivers the best of both worlds in cold water, temperate water, and multi-dive thermal protection.

- Made from 100% Everflex neoprene for comfort and durability.
- CE certified a Class A dive suit -- rated for water temperatures ranging from 45°F (7°C) to 54°F (12°C).
- Pure Design Concept uses fewer seams and panels to ensure maximum flexibility.
- · Blind-stitched seams block water entry.
- Internal stress discs installed at stitch intersections protect seams, extending the suit's working life.
- Rear shoulder-to-shoulder YKK Aquaseal Vislon waterproof main zipper with heavy-duty plastic slider is flexible yet provides an excellent seal against water entry.
- Plush interior liner in the arms, legs and shoulder areas increases warmth and stretch.

• Made from X-Foam, a petroleum-free.

limestone neoprene.

- Zippered seals on ankles and wrists feature KA brass sliders for durability, water-tightness and ease of use.
- Fold-under neck seal is ultracomfortable and keeps water seepage to a minimum.
- Right thigh 3D pocket offers lots of room for carrying extra gear. The hood hook has been moved to the outside of the pocket for added convenience.
- Shoulders and kneepads feature both anti-abrasion patterns and extra rubber prints to provide protection while adding a stylish look.
- Enhanced spine pad provides a welcomed cushion where the tank hits the diver's back.
- I-Safe straps on both arms offer nonslip mounting spots for securing wrist instruments.
- 6/4mm hood included with suit.

EVERFLEX YULEX® STEAMERS

YULEX. DIVE

SCUBAPRO's premium Everflex steamers are now built with YULEX® dive, a plant-based foam made from natural rubber.

Everflex YULEX® dive steamers offer the same award-winning comfort and thermal protection that have made Everflex the wetsuits of choice among divers around the world. They are designed with SCUBAPRO'S exclusive Pure Design Concept, with just enough multi-thickness panels to guarantee maximum stretch and comfort. They provide superb water resistance, and fit comfortably snug to reduce water movement, keeping you warmer during long, deep dives. The foam is layered inside and out with a polyester lining made from recycled plastic bottles, and an updated Diamond Span inner fleece lining in the torso area enhances warmth while making donning and doffing so much easier. Everflex YULEX® dive steamers are offered in three thicknesses to cover virtually every diving scenario and are loaded with features that maximize comfort, warmth and ease of use.

When choosing Everflex YULEX®, most divers find going one size larger than what they normally use tends to fit best. These suits are form-fitting and snug on the surface but loosen up in the water to move effortlessly with you.

SCUBAPRO

PERFORMANCE

- Pure Design Concept uses fewer seams and panels for maximum range of motion.
- Multi-thickness panels deliver a superior combination of warmth and flexibility.
- Innovative preformed design delivers an excellent fit for most body shapes.
- Double blind-stitched outer seams are durable and watertight, and single blind-stitched inner seams on the 5/4mm and the 7.5/5mm steamers are comfortable against bare skin. The 3/2 steamer utilizes a glued inner seam for comfort.
- Updated Blue Diamond Span inner fleece lining's warm and water-draining material enhances coldwater protection. It is combined with a second black lining for improved stretch, also making donning and doffing much easier.
- Vertical rear YKK zipper with brass slider offers increased long-term durability, and the long webbing puller makes it easy to use.
- Compression-molded zipper flap/spine pad increases back protection.
- Internal cuff seals with zippered cuffs on ankles and wrists feature YKK brass sliders for durability, watertightness and easy donning (7.5/5mm).
- Internal cuff seals with zippered cuffs on ankles feature YKK brass sliders for durability and watertightness, and are combined with fuse-cut wrists to make donning easy (5/4mm).
- Wrists and ankles feature fuse-cut finished cuffs that are super-stretchy for easy donning and exceptional comfort (3/2mm).
- Small neck zipper enhances comfort.
- Seat and shoulder areas are protected by an abrasion-resistant outside lining to increase durability and extend the life of the suit.
- Printed pads on knees and shoulders provide additional abrasion protection.
- I-Safe straps on both arms offer non-slip mounting spots for securing wrist instruments (7.5/5 mm and 5/4 mm).

EVERFLEX YULEX® LONG SLEEVE TOPS & PANTS, 3MM

This functional 2-piece ensemble is an alternative to the Everflex YULEX® 3/2MM steamer. Designed with the Pure Design Concept where fewer seams and panels are employed to maximize comfort and range of motion, both top and pant feature blind-stitched seams and come with a black stretch polyester outside/inside lining. The top is fitted with a vertical front zipper and wrists and ankles feature fuse-cut finished cuffs that are super stretchy for easy donning. The abrasionresistant fabric on the seat and the printed pads on the knees protect the legs, while the top provides abrasion-resistant fabric with additional printed pads on the shoulders to prevent abrasion from BCDs.

- YULEX® dive: Plant-based foam made from FSC-certified natural rubber, 100% neoprene free.
- Top and pant are assembled with blind-stitched seams using a solvent-free glue, a better process for people, the environment and the ocean.
- Pure Design Concept uses fewer seams and panels for maximum range of motion.
- Black stretch polyester outside/inside lining made from recycled plastic bottles enhances comfort.
- Top includes a convenient vertical front zipper.
- Fuse-cut finished cuffs on wrists and ankles are superstretchy for easy donning and doffing.
- Abrasion-resistant fabric on the seat and shoulders, with additional printed pads on shoulders and knees, increase durability and extend the life of these separates.
- YULEX® dive foam is specifically formulated to resist wetsuit compression while diving.

EVERFLEX YULEX® HOODED VESTS, 5/3MM

When worn with a SCUBAPRO steamer or shorty, the Everflex YULEX® Hooded Vest substantially increases thermal protection with 5mm panels on the front and back of the torso area. To increase range of motion, the side panels provide 3mm of thermal protection. To warm the head, the attached hood offers 3mm of thermal protection and features a 2mm face seal to help seal off water entry and minimize heat loss. Assembled with solvent-free glue and blind-stitched seams, the inside of the vest is lined with a combination of blue Diamond Span fleece and black stretch polyester. The hood also has a black stretch polyester inner lining.

- YULEX® dive: Plant-based foam made from FSC-certified natural rubber. 100% neoprene free.
- Vest is assembled with blindstitched seams using a solventfree glue, a better process for people, the environment and the ocean.
- Pure Design Concept uses fewer seams and panels for maximum range of motion.
- Vest offers 5mm thermal protection in the torso area, front and back, with 3mm side panels for added flexibility.
- Inside of vest is lined with a combination of blue Diamond Span fleece and black stretch polyester, the latter of which is made from recycled plastic bottles.
- Hood provides a thickness of 3mm laminated with an outside/ inside black polyester lining. Also features a 2mm face seal.
- YULEX® dive foam is specifically formulated to resist wetsuit compression while diving.

EVERFLEX YULEX® HOODED VEST, 2MM

This is a lighter-weight version of the 5/3mm hooded vest that can be worn either by itself or for layering in warm-water dive scenarios. Offering lots of stretch to maximize range of motion, this comfortable 2mm vest and hood offer a black stretch polyester outside/inside lining and a face seal for the hood.

- YULEX® dive: Plant-based foam made from FSC-certified natural rubber. 100% neoprene free.
- Vest is assembled with flat-lock seams using a solvent-free glue, a better process for people, the environment and the ocean.
- Both hood and vest offer 2mm of thermal protection and a black stretch polyester outside/inside lining made from recycled plastic bottles.
- Hood includes a face seal to cut down on water intrusion and increase warmth.
- YULEX® dive foam is specifically formulated to resist wetsuit compression while diving.

EVERFLEX YULEX® SLEEVELESS SWIMSUIT WOMEN, 2MM

This stylish swimsuit, is the ideal garment for pool training or ocean swimming in warm climes. It can also be worn as a first layer in an exposure protection layering ensemble for additional warmth. The swimsuit is designed with the Pure Design Concept to maximize comfort, fit and range of motion. A convenient front zipper makes donning easy, and the black polyester outer/inner lining is comfortable against bare skin.

- YULEX® dive: Plant-based foam made from FSC-certified natural rubber. 100% neoprene free.
- Suit is assembled with flat-lock seams using a solvent-free glue, a better process for people, the environment and the ocean.
- Pure Design Concept uses fewer seams and panels to maximize comfort and range of motion.
- Vertical front zipper makes donning and doffing quick and easy.
- Black stretch polyester outer/inner lining made from recycled plastic bottles is comfortable against bare skin.
- YULEX® dive foam is specifically formulated to resist wetsuit compression while diving.

DEFINITION STEAMERS, 5MM

The Definition 5mm steamer offers lots of stretch, comfort and features with an athletic cut. Special tailoring and strategically placed panels in the chest area, sides, arms and legs, and behind the knees, create a suit that fits like a glove and provides extra stretch where it's needed most. Big abrasion-resistant shoulder, knee and elbow pads provide maximum protection. This is thermal protection well-suited to active temperate-water and warm-water divers.

- Ultraspan chest panel and Stretchtec fabric on body, sides, arms and legs work together to produce a highly flexible and snug fit.
- Orange Infrared (IR) interior lining on the front and back torso reflects body heat for extra thermal insulation and is extremely soft against the skin.
- Diagonal rear YKK zipper with brass slider offers increased long-term durability and ease of use.
- Innovative seamless single arm and leg stretch panels, with double zippered seals, make donning and doffing the suit even easier.
- Wrist and ankle zippers on women's suits are extra-long for added convenience.
- Spine pad cushions the tank, providing additional comfort during extended dives.
- Abrasion-resistant fabric on shoulders and seat, along with big abrasionresistant printed shoulders, elbow and

- knee pads, cover more exposed areas and increase long-term durability.
- Small neck zipper enhances topside comfort, eliminating the need to remove the suit between dives.
- I-Safe straps on both arms offer nonslip mounting spots for securing wrist instruments.
- Embossed and color-printed 'S' logo on chest offers better stretch and a cleaner profile.
- Size indicators are printed on the wrist seal, including height, weight and clothes size.
- Made from X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.
- Suit is assembled using a solvent-free alue.
- CE certified as a Class B dive suit –rated for water temperatures ranging from 50°F (10°C) to 64.5°F (18°C).

DEFINITION STEAMERS, 1MM

Delivering optimal comfort and flexibility, this lightweight steamer is made with 1mm X-Foam neoprene with a Nylon 2 Sides lining. It comes with a diagonal rear zipper with brass slider, abrasion resistant panels on shoulders, elbows and knees, and foot loops to prevent ride-up when used as a base layer beneath a thicker wetsuit. It offers the perfect level of full-body protection for pool training, warm-water diving or layering for any watersport activity.

- Can be worn for pool training, as a warm-water wetsuit, or as a base layer for thicker wetsuits.
- Made with quality 1mm neoprene with a Nylon 2 Sides lining.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Body Map System features special tailoring and material inserts to compensate for the stresses of the human body.
- Rear diagonal zipper with brass slider makes easy work of donning and doffing the suit.
- Foot loops prevent ride-up when worn beneath a wetsuit.
- Flat-lock seam construction is comfortable against bare skin.
- Made with X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.
- Available in 7 men's and 8 women's sizes.

SPORT STEAMERS, 5MM & 3MM

STRETCH

Sport suits are great choices for new divers, casual divers, and first-time suit buyers who enjoy diving in moderate to shallow depths. Made from super-soft neoprene, they feature a triathlon cut that allows for lots of range of motion in the shoulder and arm areas for maximum freedom of movement on the boat and in the water. Design enhancements include smart exterior styling and colors, a vertical-cut rear zipper, wrist and ankle zippers (5mm), and a hood hook on the right hip. These suits are easy to put on and take off, are stretchy and comfortable, fit like a second skin and look good in the process.

- Designed to keep new divers and casual divers warm and comfortable while diving in moderate to shallow depths.
- Softer and more flexible neoprene makes it easy to put on and take off, maximizes range of motion and improves overall comfort.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Triathlon cut employs wider panels covering the underarm and back areas that allow unrestricted arm and shoulder movement.
- Main vertical-cut YKK rear zipper with KA brass slider offers increased longterm durability and ease of use.
- Single zippered cuffs on ankles and wrists with YKK KA brass sliders offer durability and comfort plus are easy to use (5mm). Single cuffs with plush inside (3mm).
- The interior is lined with one (3mm) or two (5mm) plush materials that enhance comfort and warmth, dry quickly and provide cushion beneath wrist and ankle zippers.
- Glued and blind-stitched seams keep warmth in and water out.
- Abrasion-resistant fabric on shoulders, seat and knees protects against shifting gear or when sitting or kneeling.
- High-stretch neoprene is great for hard-to-fit divers who can now enjoy a suit that molds comfortably to the body.
- Made from X-Foam, a petroleum-free, limestone neoprene.
- Suits are assembled using a solventfree glue.
- For detailed size information, please refer to the Exposure Protection Sizing Guide.

5MM

Must-have thermal protection for first-time suit buyers who love leisurely warmer water diving. Has wrist and ankle zippers. CE certified a Class B dive suit – rated for water temperatures ranging from 50°F/10°C to 64.5°F/18°C.

SPORT STEAMERS, 0.5MM

This versatile ultra-thin neoprene steamer can be used for thermal protection while pool training, as a warm-water wetsuit, or as a base layer beneath a thicker wetsuit for cold-water diving. Made from extremely soft 0.5mm neoprene with a stretchy Nylon 2 Sides lining, this lightweight steamer comes with a vertical YKK zipper with brass slider for easy donning and doffing, and foot straps to prevent ride-up when used as a base layer. Printed kneepads increase durability while maintaining comfortable flexibility in the leg areas.

- Can be worn for pool training, as a warm-water wetsuit, or as a base layer for thicker wetsuits.
- Nylon 2 Sides lining is soft, stretchy and extremely comfortable.
- Vertical YKK rear zipper with brass slider offers long-term durability and ease of use.
- Thumb loops and foot straps make it easier to put on the suit, plus help prevent ride-up.
- Flat-lock seam construction is comfortable against bare skin.
- Printed kneepads protect lower legs while maintaining softness.
- Made with X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.
- Available in 7 men's sizes in Black/ Gray and 7 women's sizes in Black/ Caribbean.

SPORT SHORTYS, 2MM

STRETCH

This incredibly soft shorty offers lots of warmth, comfort and stretch for casual tropical divers who enjoy diving in moderate to shallow depths. Made from super-soft 2mm neoprene with an inside/outside polyester lining, the shorty features the triathlon cut from Sport steamers that allows for lots of range of motion in the shoulder and armpit areas. Design enhancements include smart exterior styling and colors and a vertical-cut rear zipper. This shorty is easy to put on and take off, is stretchy and comfortable, fits like a second skin and looks good in the process.

- Designed to keep new and casual tropical divers warm and comfortable while diving in moderate to shallow depths.
- Also provides good thermal protection for pool training.
- Softer and more flexible neoprene makes it easy to put on and take off, maximizes range of motion and improves overall comfort.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Triathlon cut employs wider panels covering the underarm and back areas that allow unrestricted shoulder movement.

- Vertical YKK rear zipper with brass slider offers increased long-term durability and ease of use.
- Flat-lock seam construction is comfortable against bare skin.
- Made with X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.
- Assembled using a solvent-free glue, a 100% green process.
- Product logo on the arm includes neoprene thickness for easy identification.

Designed to layer with any SCUBAPRO steamer, this classic hoodless vest is made of 2mm limestone-based pure neoprene, lined outside with stretchy recycled polyester fabric and lined inside with stretchy and warm plush made of recycled nylon. The Sport 2mm Hoodless Vest features dark logos on the chest and spine for that modern look, and is intended to cover the torso to protect the body's thermal area. Flexible and comfortable, it's the perfect thermal addition for those times when extra thermal layering is the plan for the dive day.

- Provides extra warmth over the torso, a critical area for minimizing heat loss, while the sleeveless cut leaves arms free for mobility.
- Super-stretchy so it's easy to don and doff, while also adding warmth and comfort.
- Fast-drying, the vest remains comfortable for use and reuse during a long dive
- Made from 2mm X-Foam limestone-based pure neoprene.
- The outside is lined with stretchy recycled polyester, while the inside is lined with stretchy and warm plush made from recycled nylon.
- Anatomical design for perfect body fit.
- Sleeveless and wide arm openings for easy donning and doffing.
- Soft and stretchy binding on arms, neck and waist for comfort.
- Dark graphic print on chest and spine enhances styling.
- Flatlock construction.
- Available in a variety of unisex sizes, from 2XS to 4XL.

REBEL STEAMER, 2.5MM great for small divers

PRICE

Part Number

63.874.500

MRP

146.00

Description

This well-cut steamer is offered in a 2.5mm thickness for maximum comfort and protection when diving in warm waters. The soft neoprene is made from X-Foam, a neoprene formulation that is non-toxic. It's the only neoprene formulation that complies with the very strict P.A.H. (Polycyclic Aromatic Hydrocarbons) test requirements.

- Diagonal YKK back zipper and long ankle zippers make the suit extremely easy to don and doff.
- Plush torso interior is comfortable and contributes to overall thermal protection.
- Thinner-skin neoprene on wrists can be rolled up or down depending on arm length.
- Short zipper at the neck enhances comfort during surface intervals.

- Stretch neoprene side panels increase range of motion.
- Reinforced kneepads protect the legs of both suit and diver when kneeling on the bottom.
- Made from X-Foam, a petroleum-free, limestone neoprene.
- Suit is assembled using a solvent-free glue.

REBEL SHORTY, 2MM

great for small divers

Smaller divers will enjoy wearing this shorty with its cool, modern design. It provides comfort and warmth under water and good sun protection for snorkeling and surface swimming. The sophisticated cut creates a comfortable fit that leaves no pressure marks. The soft neoprene is made from X-Foam, a neoprene formulation that is non-toxic and complies with the very strict P.A.H. (Polycyclic Aromatic Hydrocarbons) test requirements.

- Stretch binding at neck, arms and legs makes it comfortable to wear, helps keep water out and warmth in.
- Nylon 2 Sides construction increases overall comfort.
- Diagonal YKK back zipper is comfortable and makes it easy to get in and out of the suit.
- Made from X-Foam, a petroleum-free, limestone neoprene.
- Suit is assembled using a solvent-free glue.

ONEFLEX 7, 5, 3 MM STEAMER, BACK ZIP

The 7, 5, and 3mm Oneflex steamers deliver superb thermal protection. Offering straight-forward styling, the suits are designed with a triathlon cut that allows for lots of range of motion in the shoulder and arm areas. They are also built using the Pure Design Concept which uses fewer seams and panels for maximum flexibility, and their 2-sided polyester lining is ultradurable yet stretchy and comfortable. The addition of outside stretch fabric on arms and armpits contribute to making the suits much easier to don and doff while increasing comfort and freedom of movement, design elements much appreciated by beginning divers. The diagonal rear YKK zipper design is familiar to most divers and easy to use. It all works together to make Oneflex steamers the ideal wetsuits for repeated use at training centers and rental locations.

HYBRID CARGO SHORTS AND PANTS, 1MM

Comfortable and stretchy, Hybrid Cargo Shorts and Pants are made of quality 1mm X-Foam neoprene and stretchy nylon so they form-fit to your body like you were born wearing a pair. On the inside, a micro-plush lining makes them warm and cozy. This plush lining absorbs less water, increasing overall warmth, plus dries quickly. For 2024, Hybrid Cargo Shorts and Pants come with larger Velcro pockets featuring internal bungees and a D-ring, along with large, fast-draining eyelets. Also new is an additional zippered pocket for stowing small valuables. The shorts and pants come with an adjustable waist belt that threads through a series of belt loops and includes an easy-to-use male/female squeeze buckle closure. Antiabrasion fabric on the seat panel enhances durability. Designed to be worn either by themselves or over a dive suit, Hybrid Cargo Shorts and Pants are perfect for enjoying a day in the water.

- Larger volume cargo pockets offer more space for carrying valuables.
- Easier to open Velcro pocket flaps, even with gloves.
- Large-diameter pocket eyelets drain water fast.
- Internal bungees and D-ring inside pockets provide attachment points for accessories.
- Small zippered pocket on the exterior of the main pocket flap is a great place for stowing smaller items.
- Made with 1mm X-Foam neoprene for warmth and durable nylon for stretch and comfort.
- Adjustable waist belt includes an easy-to-use male/female squeeze buckle closure.
- Abrasion-resistant fabric on the seat panel provides additional protection.
- Form-fitting for that sleek hydrodynamic look and feel.
- Highly versatile ideal for divers, snorkelers, paddle boarders, swimmers and other water enthusiasts too.

HOW SHOULD YOU MEASURE?

If you plan to wear a swimsuit or other items under your divewear, you should measure yourself while wearing those garments, keeping the tape measure parallel to the floor.

CHEST: Measure around the fullest part of your chest.

WAIST: Measure at the narrowest point of your waist.

HIPS: Stand with your heels together and measure around the fullest part of your hips.

EVERFLEX BIBBED HOODS 6/5/4 & 3MM

Diving hoods minimize heat loss from the head area, so if you tend to get cold after a time at depth there's no better fix than to add a hood to your dive suit. These updated hoods with warmth-enhancing bibs are made of 100% high-stretch Everflex Nylon outside for maximum flexibility and durability, with an inside lining of comfortable plush. Both hoods feature face seals to cut down on water transfer, making them the perfect additions for either cold-water dives or extended warmwater dives.

- Design and pattern improves fit and comfort.
- Face seal cuts down on heat loss from water transfer.
- · Interior plush makes donning and doffing super easy and provides excellent comfort.
- 100% high-stretch Everflex Nylon outside.
- Made with X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.
- Assembled using a solvent-free glue, a 100% green process.

EVERFLEX ARCH BOOT, 5MM

The Everflex Arch Boot just might be the most comfortable dive boot you've ever slipped your foot into. Featuring an innovative arch design that closely matches the foot's natural anatomy, the boot's foot pocket is cut wide, creating a cramp-free fit, even for wide-shaped feet. While the boot offers 5mm of thermal protection throughout most of the boot, in the upper ankle area the neoprene is a bit thinner to prevent bulkiness where it overlaps the wetsuit leg. The Diamond Span inner lining is super comfortable and dries fast. For 2022, the Everflex Arch Boot features a new Black/Gray "boat-style" color and a new logo.

 Innovative arch design provides a level of supple and comfort not often found in dive boots.

• Boot's 5mm neoprene, laminated on the outsid with super-stretch nylon, is so pliable that donning and doffing is easy without the need of zipper.

• No-zip design includes webbing puller loops in front and back to aid in donning.

 Diamond Span interior improves warmth and comfort and dries fast.

• The outside of the toe box is cushioned and protected against abrasion.

• Heel cap includes a molded fin strap keeper to eliminate strap slippage.

• Made with X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.

DELTA BOOT, 5MM

The popular Delta 5mm, our top-selling leisure dive boot, features a sturdy but flexible outsole and rubberized protective armor, yet still feels very light on the foot. A full cut design with contoured top creates a comfortable, cramp-free fit. The YKK zipper makes donning and doffing the boot quick and easy.

- 5mm N2S (Nylon 2 Sides) construction delivers comfort and durability.
- Sturdy outsole and rubberized armor provide excellent protection on top and bottom and increase comfort when traversing rocky shorelines.
- Reinforced toe and heel caps extend boot life. Heel cap includes a fin strap keeper.
- YKK zipper is fitted with a gusset to cut down on water seepage, and secures with a Vecro tab.
- · High-quality anti-slip tread is nonmarking, a feature boat owners always appreciate.

• Made from X-Foam, a petroleum-

HEAVY-DUTY BOOT, 6.5MM

If you have ever suffered from cold feet or found yourself stumbling over sharp rocks as you made your way down to the beach, you'll appreciate this dive boot. Built to handle the tough stuff, it is both durable and comfortable, making it the ideal wetsuit boot for cold water and harsh conditions. With a Diamond Span interior for improved warmth.

- Heavy-duty nylon 2-sided neoprene ensures comfort and durability.
- Reinforced toe and heel provide protection against the elements.
- Heavy-duty rubber anti-slip molded sole protects feet from sharp rocks and craggy surfaces.
- Velcro zipper-end patch secures the side zipper when closed.
- Made from X-Foam, a petroleum-free, limestone neoprene.

HEAVY-DUTY DRYSUIT BOOT

A must-have boot for any drysuit diver who hikes or climbs to a dive site. This sturdy boot can handle the most rugged shoreline terrain and is designed to fit comfortably over the neoprene or latex sock of any drysuit.

- Lace-up design lets you quickly and easily achieve a snug, secure fit.
- Heavy-duty ultra-grip sole protects the foot when traversing rocky shorelines.
- Neoprene upper is ultra-flexible, enhancing overall comfort.
- Toe and heel are reinforced with durable rubber caps to protect both boot and foot.
- Heel cap features a fin strap keeper to eliminate slippage when engaged in aggressive kicking.
- Boot comes with a water-draining mesh storage bag.

HYBRID SOCK, 2.5MM

great for small divers

The new Hybrid Sock is made of soft 2.5mm neoprene with a textured sole that provides a bit of non-slip protection for walking on wet boat decks. Featuring 100% high-stretch Everflex Nylon outside and a plush interior lining for warmth and comfort, you can wear the Hybrid Sock inside your dive boot for added warmth, as a liner inside a full foot fin, or by itself to walk around on a chilly boat deck. Whichever you choose, your feet will love you for it. Easy to don and doff, this sock is great footwear for freedivers too, and also for small divers (the three smallest sizes are designed to fit the smallest of divers).

K2 SOCK

When diving cold water it's important to keep your extremities warm, particularly hands and feet. The K2 sock is designed to be worn inside attached drysuit boots to keep feet toasty warm during those extended bottom times. Made from the same K2 fleece that you find in SCUBAPRO's K2 drysuit undergarments, the K2 sock is breathable and stretchy for maximum comfort as well as warmth, and the high-cut design covers a lot of ankle area. Available in black with attractive gray stitching, in 5 unisex sizes.

KAILUA BEACH WALKER

This popular water shoe's sporty design combines soft neoprene with mesh construction, providing lots of breathable comfort while allowing water to drain. The anti-slip sole is lightweight and pliable yet offers good foot protection when walking on wet boat decks or rocky beaches. An adjustable bungee cord with ankle lock allows you to cinch the shoe up snug to prevent slippage. Available in 14 unisex sizes to ensure that perfect fit.

SEAMLESS GLOVE, 1.5MM

Using heat taping instead of traditional stitching transforms this lightweight 1.5mm glove into an extremely soft, flexible and tactile hand warmer. By eliminating the stitching, you gain dexterity in the fingers, making it much easier to push dive computer buttons and handle gear at depth.

- Printed palm provides a non-slip surface for maintaining a secure grip.
- Palm material is not coarse so will not scratch your face when brushing hair away to make a mask seal.
- Ultra-flexible neoprene makes easy work of donning and doffing.

TROPIC GLOVE, 1.5MM

The ever-popular Tropic glove features unique patterns and comes in colors that match SCUBAPRO's UPF Collection. Stylish looks aside, this soft tropical glove still features a 1.5mm neoprene back for comfort and warmth, plus an Amara palm to protect against infection-prone finger cuts when grasping barnacle-encrusted dive ladders in tropical waters.

- Reinforced fingertips and palm increase durability while ensuring a non-slip grip.
- Amara fabric layer on palm is resistant to punctures and remains soft when dry.
- Velcro wrist seal is adjustable to ensure a snug fit.
- Assembled using a solvent-free
- Made from X-Foam, a petroleumfree, limestone neoprene.

MASKS, FINS, SNORKELS pgs 141-194

Sharing the sleek styling of the D-Series D420 regulator, the D-Mask is a premium mask well-suited for all types of diving. This low-volume, wide-view mask is available in a choice of skirt sizes and features true color UV protective lenses that deliver the best balance of surface protection and underwater clarity. The mask also features an interchangeable lens system for optional optical lenses. A Comfort Strap and a HUD mount adapter are included. The D-Mask benefits from SCUBAPRO's second-generation Trufit technology. This design approach features a mask skirt with thicker, firmer silicone near the mask frame to provide support and rigidity, and thinner silicone contouring the face for comfort and to ensure a watertight seal.

 True color UV protective lenses
offer protection from UV light on
the surface without affecting colors
under water.

- Trufit technology can be identified by its unique ribbing texture on the mask skirt.
- Available with a choice of skirts to suit a variety of face shapes.
- Rotating buckles work with an all-black Comfort Strap to optimize range of motion and achieve a comfortable, watertight fit.
- Interchangeable lens system makes it easy to install optional optical lenses.
- Optional lenses available: (6x positive +1.5 to +4.0/8x negative -1.5 to -5.0); Bi-Focus lenses (3x positive +1.0 to +3.0).
- Optional ultra clear & UV-cut lenses available.

SYNERGY 2 TWIN TRUFIT

Called the most comfortable dive mask on the market, you have only to try on a Synergy 2 Twin Trufit to feel the difference. Its Trufit Technology design incorporates not one but two separate silicone skirts – a thin, soft inner skirt for fit and comfort, and a thicker outer skirt to provide support near the mask frame. This innovative dual skirt design sets it apart from the original Synergy Twin, and has proven to provide an entirely new level of comfort during extended periods under water while ensuring a reliable watertight seal on virtually all face shapes. This low-volume dual lens mask also provides excellent field of view, and the buckle system is easy to use. The mask frame is spray painted for that premium look.

• Trufit Technology design uses two
skirts for creating a comfortable,
watertight seal.

- Main skirt offers a thin and soft silicone material for the best possible fit, seal and comfort against the skin.
- Outer skirt, made with firmer silicone, provides support and rigidity where needed.
- Trufit Technology can be identified by its unique ribbing texture.

 Rotating buckles work with a
micro-adjustable strap to achieve
a comfortable, watertight fit.

- Buckle tabs are flexible, enabling the mask to be folded flat for traveling.
- Mirrored lens option delivers a glare-free view of the underwater world
- Will accommodate the mask mount for the Galileo HUD handsfree dive computer.
- Comes with a Comfort Strap.

TRUFIT TECHNOLOGY — FEELS LIKE NOTHING. FITS LIKE NOTHING ELSE.

SCUBAPRO's revolutionary Trufit mask skirt design forms a watertight seal on virtually any face, allowing divers to have a secure mask without sacrificing comfort. Trufit mask skirts are designed with the highest quality silicone and are identifiable by their unique ribbing texture.

Synergy 2 Trufit

The latest generation of Trufit technology features two separate silicone skirts. The main inner skirt is thin and soft to provide the best possible fit, seal and comfort against the skin. The outer skirt is thicker to provide support and rigidity near the mask frame.

Synergy Trufit

Second generation Trufit technology features one skirt made of two thicknesses of silicone. The silicone near the mask frame is thicker and firmer with a matte finish for additional support and rigidity. The silicone contouring the face is thinner, providing a pliable, extremely comfortable watertight seal.

SYNERGY 2 TRUFIT

Called the most comfortable dive mask on the market, you have only to try on a single lens Synergy 2 Trufit to feel the difference. Its Trufit Technology design incorporates not one but two separate silicone skirts – a thin, soft inner skirt for fit and comfort, and a thicker outer skirt to provide support near the mask frame. This innovative dual skirt design sets it apart from the original Synergy, and has proven to provide an entirely new level of comfort during extended periods under water while ensuring a reliable watertight seal on virtually all face shapes. This low-volume single lens mask also provides a wide and unobstructed field of view, and the buckle system is easy to use. The mask frame is spray painted for that premium look.

• Ultra-clear glass provides a
bright and clear view of the
underwater world.

- Trufit Technology design uses two skirts for creating a comfortable, watertight seal.
- Main skirt offers a thin and soft silicone material for the best possible fit, seal and comfort against the skin.
- Outer skirt, made with firmer silicone, provides support and rigidity where needed.

 Trufit Technology can be

SYNERGY TWIN TRUFIT

The Synergy Twin benefits from SCUBAPRO's second-generation Trufit Technology. Unlike its predecessor, which featured a skirt made with uniformly thin silicone, the Synergy Twin Trufit features a skirt made of two thicknesses of silicone – thin and pliable where it touches the face for comfort and to ensure a watertight seal, and thicker near the mask frame for support and rigidity. It's an effective combination that delivers a comfortable fit for a wide range of face shapes as well as a reliable seal against water intrusion. The dual-lens design is low volume and offers a wide field of view.

- All-black version for military use or for divers who don't want colored equipment.
- Trufit Technology can be identified by its unique ribbing texture on the mask skirt.
- Silicone near the mask frame is thicker and firmer with a matte finish for additional support and rigidity.
- Silicone contouring the face is thinner, providing a pliable, comfortable watertight seal.
- Rotating buckles work with a micro-adjustable strap to achieve a comfortable, watertight fit.
- Buckle tabs are flexible, enabling the mask to be folded flat for traveling.
- Will accommodate the mask mount for the Galileo HUD hands-free dive computer.
- Comes with a Comfort Strap.

The Synergy Mini is the little brother/sister of the Synergy Twin mask. With its downsized design, it features a smaller frame and a smaller skirt to accommodate smaller faces. The Synergy Mini's Trufit skirt is both extremely comfortable and ensures a watertight seal on men and women who have had issues getting the full-sized Synergy Twin to seal on their faces. The dual lens design is low volume and offers a wide field of view, and the mask comes standard with a color-coordinated Comfort Strap.

- Downsized, with a smaller frame and a smaller skirt to fit smaller faces.
- Trufit Technology can be identified by its unique ribbing texture on the mask skirt.
- Silicone near the mask frame is thicker and firmer with a matte finish for additional support and rigidity.
- Silicone contouring the face is thinner, providing a pliable, comfortable watertight seal.
- Rotating buckles work with a color-coordinated Comfort Strap to optimize range of motion and achieve a comfortable, watertight fit.
- Ultra Clear lenses provides optimal clarity under water.
- In 4 colors with a black skirt, and 4 colors with a clear skirt.

MAP	27.00

Part Number	Description
24.101.004	Mask Mount

The new Zoom Lite dual-lens mask offers divers a more comfortable, lightweight experience. It offers all of the same features and functions of the standard best-selling Zoom mask, but comes with lightweight polycarbonate lenses instead of glass. The mask comes with a choice of solid-color frames and skirts and includes an integrated buckle design that is compatible with the Comfort Strap. For divers who use optical lenses, the Zoom Lite features an easy lens-change system that enables you to switch lenses yourself, without tools, in less than a minute.

•	Lightweight polycarbonate
	lenses.

- Low volume design makes clearing easy.
- Universal fit ensures a comfortable, watertight fit.
- Integrated buckles make adjustments easy.
- Equipped with a standard silicone strap.

- Compatible with optional Comfort Straps.
- Convenient lens-change system lets you change the lenses yourself, without tools, in less than a minute.
- Optional accessories like a HUD hands-free dive computer mount adapter and optical/ bifocal glass lenses are also available.

• Care Information: Do not use toothpaste, harsh or abrasive	
cleaning agents. When not in use, avoid placing in very high	
or low temperatures and sunlight. Clean the outside only	
with clean, cold water and a soft cloth.

Front

The Zoom is a low volume dual-lens mask that is ideal for all divers, but is especially well-suited to divers who use optical lenses. The mask has an innovative lens-change system that enables you to switch lenses yourself, without tools, in less than a minute. Featuring spray-painted sub-frames in colors matching Seawing Nova fins, HYDROS BCDs and the UPF Collection of rash guards, steamers and leggings, the Zoom offers a universal fit and includes an integrated buckle design that is compatible with the Comfort Strap.

• Convenient lens-change
system for divers who use
ontical lenses

- Lens-change system lets you change the lenses yourself, without tools, in less than a minute.
- Low volume design makes clearing easy.
- Universal fit ensures a comfortable, watertight fit.
- Integrated buckles make adjustments easy.
- Colorful spray painted subframes come with black or clear skirts.
- Equipped with a standard silicone strap.

- Compatible with optional Comfort Straps.
- Optional accessories like a HUD hands-free dive computer mount adapter, color kits and optical/bifocal lenses are also available.
- Replaceable Optical Lenses range from -1.0 to-8.0 (in .5 diopter increments). Lenses are interchangeable and will fit either the left or the right side. See following page.
- Add-on Bi-Focus lenses are magnifiers that are bonded to plain lenses and range from +1.0 to +3.0. These have a left and right side.

The stellar dual lens Spectra offers a wide view and a comfortable water-blocking seal, plus it features an exclusive paint process that transforms your mask into stylish eyewear.

• All-black version for military use or
for divers who don't want colored
equipment.

- Dual-lens design is low volume for easy clearing plus offers maximum field of view.
- Ultra Clear lenses are made from tempered glass for safety and longterm durability.
- Universal skirt design is super comfortable and fits a variety of face shapes.
- Mirrored lens option delivers a glarefree view of the underwater world.
- Special nose pocket design makes easy work of equalizing.

- Swivel buckles adjust easily to achieve a perfect fit.
- Bold frame colors include stylish duotones.
- Equipped with a standard silicone strap.
- Compatible with optional Comfort Straps.
- Will accommodate the mask mount for the Galileo HUD hands-free dive computer.
- Note: Painted finish may be damaged if cleaned with abrasive products.

SPECTRA MINI

great for small divers

Not every face can wear a full-sized Spectra. That's why SCUBAPRO offers the Spectra Mini. This mask offers all of the comfort and performance features of the standard Spectra in a scaled-down size to cater to small or narrow faces.

• Compact, dual-lens design is low
volume for easy clearing plus
offers maximum field of view.

- Ultra Clear no-tint glass delivers optimal clarity under water.
- Lenses are made from tempered glass for safety and long-term durability.
- Universal skirt design is super comfortable and fits a variety of face shapes.
- EZ Equalize nose pocket design makes easy work of equalizing.

•	Buckles attach to the skirt	
	and adjust easily to achieve	а
	perfect fit.	

- Mirrored lens option delivers a glare-free view of the underwater world.
- Bold frame colors include stylish duotones.
- Will accommodate the mask mount for the Galileo HUD hands-free dive computer.
- Note: Painted finish may be damaged if cleaned with abrasive products.

STEEL COMP

The ultimate freediving mask, the frameless, dual-lens Steel Comp is particularly well-suited to deep divers. It has the lowest possible internal volume so equalizing is easy. Plus, on descent the mask itself compresses, so equalization is not required as often. The soft skirt and buckle system allow for a comfortable, watertight fit on most faces.

• Dual-lens frameless design offers the
lowest possible internal volume, plus it
compresses on descent, an advantage
during deep freediving descents.

- Flat, Ultra Clear, scratch-resistant glass guarantees an undistorted view of the underwater world.
- Premium supple silicone comfortably fits a range of faces.
- Rotating buckles work with a micro-adjustable strap to achieve a comfortable, watertight fit.

 Note: with the Steel Comp, as water pressure increases the bridge between the lenses bends slightly and squeezes the mask tighter to the face. The only noticeable indication of this is a brief change in vision as the eyes need a split second to adjust. However, because of this the Steel Comp is not recommended for scuba diving.

STEEL PRO

The single-lens, low-volume Steel Pro offers an expansive view of the underwater world. Perfect for freediving or scuba diving, the frameless design is streamlined and lightweight, and the soft silicone skirt provides a comfortable, watertight fit on a range of face shapes. The black and white skirts are very effective at blocking out light reflection at depth, and the low volume design makes it a great mask for all types of diving.

- Ultra low-volume design requires minimal air when equalizing, a huge plus for freedivers.
- Premium super-soft silicone skirt seals out water and comfortably fits a range of faces.
- Ultra Clear scratch-resistant glass lens delivers undistorted vision and long-term wear.
- Easy-adjust rotating buckles work with a micro-adjustable strap to achieve a comfortable, watertight fit.

A large single lens design plus seamless side windows equals an expansive view under water. Offering great styling with low internal volume, the crystal-clear double-sealed silicone skirt offers a seal that is both comfortable and watertight. Swivel buckles allow for the perfect fit and an exclusive paint process lets you dive with style.

- Patented single-lens design with side windows creates a panoramic field of vision.
- Ultra Clear no-tint glass delivers optimal clarity under water.
- Crystal-clear double-sealing skirt is comfortable against the skin and keeps water out.
- Low volume styling and convenient swivel buckles allow for a snug fit and ease of clearing.
- EZ-grab nose pocket makes easy work of equalizing.
- Also available with a purge valve.

SOLARA

This classic low-volume dual-lens mask is built with an impact-resistant polycarbonate frame for strength and durability. The hypoallergenic silicone skirt with double-feathered edge is super-comfortable and provides a watertight seal on virtually all face shapes. A non-slip strap and easy-adjust buckles let you dial in the perfect fit.

FRAMELESS

SCUBAPRO's classic Frameless is diving's original frameless mask and it continues to be the mask of choice among professional divers throughout the world. Its single lens design features a distinctive rectangular shape that provides an excellent view on the periphery as well as straight ahead. The soft silicone skirt is comfortable yet durable, and the double-edge seal feels good against the skin.

- Frameless single lens design provides an expansive field of view while reducing volume.
- Soft silicone skirt uses a doubleseal system for a comfortable, leak-proof fit.
- Traditional buckles attach to the skirt, enabling the mask to be folded flat for traveling.
- Wide headband allows for a comfortable fit against the back of the head.

COMFORT MASK STRAPS new color

Upgrade your diving or snorkeling mask with a Comfort Strap. Similar to a ski goggle strap, the Comfort Strap is comfortable, protects hair from being pulled, and attaches quickly and easily to a variety of mask models.

- Comfort Strap with black-on-black branded logo developed for the new D-Mask. Also good for any SCUBAPRO black mask divers whose masks use female, roundbuckle connections.
- Ideal addition to any diving or snorkeling mask.
- Uses the same design concept as a strap used on ski goggles.
- Easy to attach, easy to use.
- Enhances mask comfort and protects hair from knots and pulls.
- One size fits all for total convenience.

SPECTRA

This snorkel is tops when it comes to breathing comfort and ease of clearing. The large-bore upper tube is rigid for stability and allows plenty of airflow, while the corrugated lower tube can be easily positioned when being used, and hangs out of the way when not being used. The semi-dry top helps prevent water from entering, the purge valve positioned at the lowest point makes quick work of any water that does sneak in.

- Large-bore upper tube is fitted with a semi-dry top to deflect surface splash.
- Corrugated silicone lower tube allows the mouthpiece to hang out of the way when breathing off a regulator.
- Purge valve, positioned at the lowest point, takes care of any water that enters the airway.

26.706.130

- Regulator-style mouthpiece offers good bite tabs for a comfortable fit, ideal for extended snorkeling adventures.
- Exclusive paint process includes stylish duotone colors.

SPECTRA DRY

The Spectra Dry's large-bore upper tube allows plenty of airflow, and its dry top actually seals the tube when the snorkel is submerged so no clearing is needed upon resurfacing. An efficient purge valve expels any water that might seep in. The flexible lower tube hangs down and out of the way when not being used.

- Large-bore upper tube with dry top is designed for dry and easy breathing.
- Corrugated silicone lower tube allows the mouthpiece to hang out of the way when breathing off a regulator.
- Purge valve, positioned at the lowest point, takes care of any water that might enter the airway.
- Regulator-style mouthpiece offers good bite tabs for a comfortable fit, ideal for extended snorkeling adventures.
- Quick-connect clip makes it easy to attach or remove snorkel from mask strap.

ESCAPE SEMI-DRY

The splashguard design of the Escape helps keep water from entering the large-bore barrel while allowing abundant airflow. Included is a very efficient purge valve located down low, an ultra comfortable regulator-style mouthpiece and a convenient clip for easy removal.

- Splashguard top design helps keep water from entering the large-bore barrel.
- Flexible, corrugated section is easy to use and drops away from face when not needed.
- Ergonomic mouthpiece enhances comfort during extended swims.
- Purge valve positioned at the lowest point requires only a quick breath to clear any errant water.
- Quick-connect clip makes it easy to attach or remove snorkel from mask stran.

SEAWING SUPERNOVA FINS

SCUBAPRO's Seawing Supernova represents the next generation of powerful SCUBAPRO fins. Winner of the prestigious, internationally-recognized Red Dot Award for product design, the new Seawing Supernova is a step up from the Seawing Nova in performance, construction, fit and versatility. The proven Pivot Control Technology (PCT) works in tandem with the unique Auto-Adjust central panel to always provide the optimal angle of attack for the blade. The PCT hinges pre-set the blade in the 40° to 50° range that is ideal for converting kicks into forward motion. The flexible Auto-Adjust central panel then fine-tunes the angle of attack according to the strength of kick by counter-pivoting, providing a milder angle of attack for comfort when kicking gently, a more aggressive angle of attack when kicking at full strength, and anything in between. When it comes to frog and alternate kicks, the new twin-tip winglets increase control and markedly improve maneuverability. Made of premium Monprene for maximum durability, the Seawing Supernova's innovative two-piece design, with blade and foot pocket molded separately, makes transport easy, and with the optional full foot pocket the fin can be modified to handle any warm-water dive scenario. The new Seawing Supernova is the essential highperformance fin for avid recreational and professional divers seeking maximum speed, power and control in all diving conditions.

- Innovative blade shape produces more power, more speed and better maneuverability.
- Blade's central panel membrane auto-adjusts the angle of attack based on kicking strength, providing easier kicking when cruising and maximum power when needed.
- Pivot Control Technology ensures that the most efficient 40° to 50° range of angle of attack is maintained.
- Twin-tip winglets improve control and maneuverability for excellent frog and alternate kicks.
- Blade and foot pocket are molded separately with a durable Socket-Lock Connecting System that allows for easy assembly and disassembly.

- Key fob-style MFS Multi-Tool is included for assembly and disassembly of the foot pocket and blade, along with a travel-friendly storage bag.
- Sold as an open heel set with open heel foot pocket and blade preassembled.
- Open heel foot pocket features an upgraded heavy-duty bungee strap that allows for micro-adjustments to accommodate different boot types.
- Extended grip pads on open heel foot pockets provide an improved non-skid grip on wet surfaces.
- Compatible with colored Scuba Skegs.

S-TEK FIN

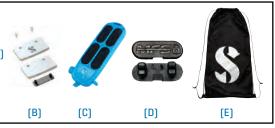

The S-Tek Fin is a purpose-built, next-gen technical diving fin providing maximum power when you need it. Constructed of durable Monprene® for maximum durability and designed with an ultra-streamlined profile, the S-Tek Fin's 30° preangled blade requires less deflection to achieve the desired angle of attack for an efficient kick. This allows for a stiffer blade without increasing drag, thereby reducing leg cramps and ankle strain while delivering unbeatable maneuverability and alternate kick performance. In particular, the S-Tek Fin excels in frog kicks, backward kicks and helicopter turns, plus produces a high-torque flutter kick.

- Clean Water Blade and Vented Blade design reduces drag and increases thrust.
- Hydra-Loop ramped and reinforced leading edge improves lateral rigidity for improved alternate kicks, plus creates a hydrofoil profile for better thrust.
- Removable Stainless-Steel Weight Plate System lets you choose between a positively buoyant, neutrally buoyant, or negatively buoyant fin.
- The S-Tek Fin's two-piece design, with blade and foot pocket molded separately, makes transport easy.
- Blade and foot pocket are molded separately with a durable Socket-Lock Connecting System that allows for easy assembly and disassembly.
- Open heel foot pocket features an upgraded heavy-duty bungee strap that allows for micro-adjustments to accommodate different boot types.
- The Complete Fin is available in black in 5 sizes (XS, S, M with Midi blades; L, XL with Maxi blades) and includes a Multi-Tool and 2 sets of Lock Plates, a Stainless-Steel Weight System and a SCUBAPRO boat bag.
- The Blade Only is available in black in 2 sizes (Midi, Maxi) and includes a Multi-Tool and 1 set of Lock Plates, a Stainless-Steel Weight System and a SCUBAPRO boat bag.
- Compatible with Modular Fin System foot pockets.

SEAWING NOVA

Setting the bar in dive fin design, the multiple-award-winning Seawing Nova delivers the power, acceleration and maneuverability of a blade fin, with the kicking comfort and efficiency of a split fin. Combining classic SCUBAPRO fin technology with the latest innovations in hydrodynamic design, divers will be hard-pressed to find a fin that's more comfortable to wear or fun to kick when cruising the underwater world.

- Built with a space-age Monprene elastomer that is virtually indestructible.
- Proprietary G4 articulated joint allows the entire blade to pivot and generate thrust.
- Wing-shaped blade creates a nearperfect balance of stiffness and flex.
- Variable Blade Geometry wing tips arc upwards, providing more power and increasing stability.
- Pivot Control Technology ensures that the most efficient 45-degree angle of attack is maintained no matter how easy or hard you kick.
- Marine-grade bungee strap is selfadjusting, comfortable, extremely durable, and makes easy work of donning and doffing the fin.
- Re-engineered footplate with comolded Grip Pads provides improved non-skid grip on wet surfaces.

SEAWING NOVA GORILLA

While identical in design to the Seawing Nova, the Gorilla uses a special additive in its compound to provide more stiffness and snap to its blade. This results in increased power and control for divers who prefer more feedback in their kicks. The stiffer blade also allows for more effective sculling, frog kicks and reverse kicks, making it an excellent choice for tech divers.

- Built with a space-age Monprene elastomer that is virtually indestructible. It includes a special additive to enhance stiffness and increase feedback.
- Proprietary G4 articulated joint allows the entire blade to pivot and generate thrust.
- Wing-shaped blade creates a near-perfect balance of stiffness and flex.
- Variable Blade Geometry wing tips arc upwards, providing more power and increasing stability.

- Pivot Control Technology ensures that the most efficient 45-degree angle of attack is maintained no matter how easy or hard you kick.
- Marine-grade bungee strap is selfadjusting, comfortable, extremely durable, and makes easy work of donning and doffing the fin.
- Re-engineered footplate with co-molded Grip Pads provides improved non-skid grip on wet surfaces.

GO SPORT GORILLA

While identical in design to the GO Sport Fin, the Gorilla features a slightly stiffer blade and heavy-duty bungee, providing that extra umph for experienced divers maneuvering through demanding conditions. It is an excellent choice for public safety and professional services divers.

- Built with a higher-grade Monprene to provide more stiffness for experienced divers.
- Open heel "Boot-Fit" design features the upgraded heavy-duty bungee strap that allows for microadjustments to accommodate different boot types.
- 25° pre-angled blade with a Central Power Panel provides longitudinal rigidity and creates a channeling
- Power Bars on the underside of the rails prevent overflex to maintain the optimum angle of attack.
- Features Black Heel Grips and Black Skegs.

GO SPORT

SCUBAPRO's GO SPORT fin features a "Boot-Fit" design and offers the same functions and features as the original GO fin. This version offers a revised Ergo3 foot pocket that has been re-profiled to accommodate boots. The blade has also been slightly revised; it provides mounting points to attach skegs that minimize sideslip and maximize stability.

DDIOCC

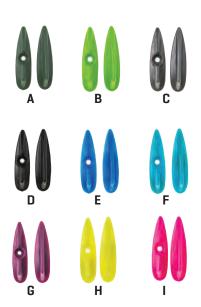

- · Lightweight design increases convenience when traveling and comfort and ease of use in the water.
- Open heel "Boot-Fit" design features a replaceable selfadjusting bungee heel strap that allows for a versatile fit and makes the fin easy to don and doff.
- Revised Ergo3 foot pocket is re-profiled for maximum comfort and power transfer.
- Ultra-strong 100% Monprene® construction avoids problems of delamination, broken blades and torn foot pockets, making it ideal for long-term, heavy-duty use.
- 25° pre-angled blade with a Central Power Panel provides longitudinal rigidity and creates a channeling effect.
- Power Bars on the underside of the rails prevent overflex to maintain the optimum angle of attack under high-load conditions.

- In-water performance delivers speed, power, stability and maneuverability with a minimum of effort.
- Fins fit easily in IATA carry-on compliant luggage for divers who like to travel the world.
- Sizing profile is the same as the Seawing Nova. Fins are available in black, blue, turquoise, white and yellow.
- Mounting points are provided to attach skegs that minimize sideslip and maximize stability.
- Skegs are offered in a variety of colors for customization and to color-code sizing in rental operations. Available colors: army green, green, sliver, black, blue, turquoise and yellow. Black fins come with silver skegs, all other colors come with black skegs.

GO Traveling, GO Diving, GO Snorkeling – with the GO fin. This travel fin combines the fitment benefits of an open heel fin, with the comfort and barefoot freedom of a full foot fin. The GO is lightweight yet virtually indestructible, plus it's a fast and nimble performer in the water. It's also designed to fit easily in IATA carry-on compliant luggage, making it the ideal fin for divers, snorkelers and swimmers who enjoy traveling.

- Lightweight design increases convenience when traveling and comfort and ease of use in the water. (For example, size XS-S weighs 1.0 kg/2.2 lbs per pair, including bungee straps; M-L weighs 1.2 kg/2.6 lbs per pair, including bungee straps.)
- Barefoot Design features a replaceable self-adjusting bungee heel strap that allows for a versatile fit and makes the fin easy to don and doff – it can also be used when wearing neoprene socks.
- Ultra-strong 100% Monprene® construction avoids problems of delamination, broken blades and torn foot pockets, making it ideal for long-term, heavy-duty use for resorts.

- 25-degree pre-angled blade with a Central Power Panel provides longitudinal rigidity and creates a channeling effect.
- Power Bars on the underside of the rails prevent overflex to maintain the optimum angle of attack under high load conditions.
- In-water performance delivers speed, power, stability and maneuverability with a minimum of effort.
- Innovative Piggy Back Stack system interlocks one fin blade into the other, creating a snug pairing that makes packing and traveling that much easier.

JET FIN W/SPRING STRAP, CAMO

The Jet Fin set the standard for power and durability when it was first introduced 50 years ago. Today, tech divers, deep divers, military divers, commercial divers and dive instructors, as well as old-school recreational divers, still strap on a pair of Jet Fins before hitting the water. This version comes with a rugged stainless-steel spring heel strap that lasts forever and makes donning and doffing as easy as can be. Each fin also includes a pairing hole that allows the fins to be hung or stored together, minimizing the possibility of misplaced or mismatched fins.

- Rubber construction is known for its durability, promising a lifetime of use.
- Proven vented design decreases

drag on the up stroke and enhances thrust on the down stroke.

• Pairing hole enables fins to be stored together.

JET SPORT ADJUSTABLE

Lightweight and comfortable, fans of traditional blade fins will be impressed with the performance of the Jet Sport. With a big, slightly stiff blade and a soft rubber foot pocket, this fin generates propulsive kicking power, provides good stability and makes efficient work of frog and dolphin kicks. The fin is easy to maneuver too – responsive in turns and able to back you out of tight spots. It's the perfect blend of performance, kicking comfort and price.

- Three-material blade construction optimizes flex to maximize kicking performance.
- Drag reducing vents substantially decrease resistance on both up and down strokes.
- Big blade generates a powerful response in the water and improves stability and maneuverability.
- Ergonomic foot pocket molds to your foot for total comfort.
- Quick-release buckles simplify strap adjustment and make donning and doffing easy.
- Effective non-skid pattern protects against slips on wet surfaces.
- Small sizing is good for smaller feet.

TWIN JET MAX

Max out on propulsion with the Twin Jet Max. This high performance split fin delivers "propeller technology" with a slightly stiffer blade than what you might expect in a flexible split fin. Designed for divers who like more feedback in their kicks, with this fin you will enjoy solid propulsion and excellent maneuverability with minimum leg and ankle stress.

- Dual-compound design results in a stiffer blade that increases propulsion and optimizes maneuverability.
- Patented split fin propeller technology produces more propulsion with considerably less effort than traditional blades.
- Drag-reducing vents where foot pocket and blade meet radically decrease drag on both up and down strokes.
- Semi-rigid side rails improve stability through the kicking cycle.
- The foot pocket is comfortable, and its extended soleplate allows you to maximize the amount of energy you expend on each kick without wasting energy.
- Steel spring straps never need adjusting, making it even easier to don and doff the fin.

TWIN JET II

Max out on propulsion with the Twin Jet II. This split fin is constructed of single material thermoplastic rubber to increase durability and maximize kicking performance while minimizing leg and ankle stress.

- Patented split fin propeller technology produces more propulsion with considerably less effort than most traditional blades.
- Semi-rigid side rails improve stability through the kicking cycle.
- Modern foot pocket offers an extended soleplate to enhance kicking power without wasting energy.
- Comes with standard straps and quickrelease buckles.
- Compatible with Twin Jet bungee and steel spring straps.

BAGS & ACCESSORIES

pgs 197-216

DEFINITION BAG LINE

SCUBAPRO's new Definition Bag line is an assortment of premium bags designed to protect your dive equipment during transport and travel. Made with new recycled two-tone gray fabric, blue accents, and a black inside lining featuring the SCUBAPRO logo, these bags are stylish and loaded with stowage options. Built to last, all zippers, pull bars and wheels are made from premium materials and constructed for long-lasting use in a diving environment.

DEFINITION ROLL 130

The Definition Roll 130 is a premium roller bag loaded with travel-friendly features, including a solid back to increase rolling stability and a telescopic tow handle for easy maneuvering through airport terminals. Huge volume main compartment includes a zippered mesh pocket on the inside cover. Additional external front compartment with zipper allows for extra storage. Made with new recycled two-tone gray fabric with blue stitched bar tack reinforcements, this quality bag is ready for world travel.

- Heavy-duty construction includes blue stitched bar tack reinforcements.
- Solid back and telescoping tow handle add to rolling convenience and stability.
- U-shaped opening features a rainproof YKK zipper with double sliders, black pull cords and a locking loop for security.
- Large zippered front pocket provides additional easy-access storage.
- Rigid bottom handle aids in lifting bag onto any table or facilitate carriage by two people.

- Comes with removable and adjustable backpack straps and top and side web handle increase carry options.
- External compression straps help snug down a partial load to make bag handling easier.
- Wheels are changeable and roll on axles treated for salt waterresistance.
- Dimensions (approximate): 28.3x16.1x17.7in/72x41x45cm Weight: 9.9lbs/4.50kg Volume: 34gal/130L

DEFINITION DUO 118

An ideal gear carrier for world travelers, the new Definition Duo 118 is a premium, double-compartment duffel bag offering a convenient U-shaped opening and a rain-proof YKK zipper with double sliders, black pull cords and locking loop for security. This bag is loaded with stowage options and can be rolled or carried with a choice of top or side web handles or new adjustable backpack straps. Top compartment features 2 semi-rigid, rotating bars which allow the bag to compress if not used and provides stability when loaded.

- Heavy-duty construction includes blue stitched bar tack reinforcements.
- Rain-proof YKK U-shape main zipper includes double sliders, black pull cords and a locking loop for security.
- 2 semi-rigid, rotating bars on top compartment can compress or stabilize the bag.
- Adjustable backpack straps come with a handy storage pocket.
- Adjustable top handle for easy rolling, and top and side web handle increase carry choices.
- Rigid bottom handle aids in lifting bag onto any table or facilitates carriage by two people.
- Large zippered front pocket provides additional easyaccess storage.
- External compression straps help snug down a partial load to make bag-handling easier.
- Wheels are changeable and roll on axles treated for salt water-resistance.

DEFINITION PACK 24

The Definition Pack 24 is a modern backpack designed for everyday use. The bag features a roll top closure with an internal padded pocket for storing a tablet or laptop, along with an extra zippered pocket on the front. Another zippered pocket in the back is ideal to carry and protect wallet / passport and other important documents. Backpack straps plus a web waist belt make transport comfortable and easy. A top carry handle is provided as well.

- Roll top closure provides easy access to internal storage space.
- Heavy-duty construction includes bar tack reinforcements.
- Front and back pockets with rain-proof YKK zippers for personal belongings.
- External webbing sleeve enables the bag to be slid over a double-bar roller bag system.
- Backpack straps, web waist strap and top handle make this an easy bag to carry around.
- Dimensions (approximate): 11x5.5x24.4in/28x14x62cm Weight: 1.5lbs/0.674kg Volume: 6.3gal/24L

SPORT BAG LINE

The new recreational Sport Bag line offers many different bag styles to help transport gear of all sizes. Made with new denim blue color fabric, white accents, and a black inside lining featuring the SCUBAPRO logo, these newly designed bags have a classic look and will protect your gear during travel.

SPORT BAG 105

No matter where in the world you plan to go diving, the new Sport Bag 105 will transport your dive gear safely and conveniently. For local diving it works great for moving gear from car trunk to dive boat or dive site, and it works just as well negotiating crowded airports as you journey to exotic dive destinations. Easy to lift, carry and roll, the Sport Bag 105 is a solid all-around choice for hassle-free gear transport.

- Large main compartment features a U-shaped opening for accessing gear.
- YKK Vision® zipper comes with double sliders, white pull cords and a locking loop for security.
- External compression straps help snug down a partial load to make baghandling easier.
- Extra pockets on top and sides provide extra storage for those smaller items you need when traveling.
- Top and bottom carry handles and double duffel straps with padded handle provide a choice of lifting and carrying options.

- Telescopic double-bar tow handle and changeable wheels on axles treated for salt water-resistance enable easy transporting.
- Internal flat zippered pocket for convenient storage.
- Main compartment features 2 elastic straps to secure your gear.
- Dimensions (approximate): 29.5x13.8x15.7in/75x35x40cm Weight: 8.9lbs/4.058kg Volume: 27.7gal/105L

SPORT BAG 125

If you're looking for a big roller bag that offers lots of volume to handle lots of gear, check out the new Sport Bag 125. The cavernous main compartment will hold a full set of dive gear with plenty of room to spare for other must-have items. The bag offers newly designed backpack straps in case you need to trek off-road and lots of handles for easy lifting. And once you're done with the day's diving, the bag folds compactly into itself for easy storage.

0

Folded

- Bag folds up into itself for easy storage between dives and can be easily carried with the two webbing handles.
- U-shaped opening comes with a YKK Vislon® zipper with double sliders, white pull cords and a locking loop for security.
- Top handle makes lifting and rolling easy and convenient.
- Newly designed backpack straps come with a handy storage pocket.
- Changeable wheels on axles are treated for salt waterresistance.

- 2 long zippered side pockets inside the main compartment provide a place to store items separately.
- Top and bottom carry handles and double duffel straps with padded handle provide additional lifting and carrying options.
- Durable bottom with protection patches on both sides for long-lasting use.
- Dimensions (approximate): 17.7x13x31.5in/45x33x80cm Weight: 5.5lbs/2.480kg Volume (main compartment only): 33gal/125L

SPORT MESH'N ROLL 100

The Sport Mesh'n Roll 100 is a heavy-duty coated mesh duffel bag on wheels. On your way to the dive site you can roll the bag or carry it like a backpack by using the double-duffel straps. On your way back from the dive site, the roller wheels enable you to avoid soggy gear drenching your backside. This bag is lightweight yet durable while offering a massive amount of cargo-carrying capability.

- Mesh sides save weight plus allow wet gear to drain when returning from the dive site.
- U-shaped opening comes with a YKK Vision® zipper with double sliders and white pull cords.
- Top internal and side external zippered pockets offer handy places for storing small items.
- Adjustable top carry handle enables easy rolling.
- Double duffel straps with padded handle can also be used as a backpack system.

SPORT MESH 95

The Sport Mesh 95 delivers lots of cargo space in a lightweight, easy-to-carry, duffel-style bag. Made with a combination of durable mesh and denim blue color fabric, the bag's cavernous main compartment can easily handle a full set of gear, with an extra inside pocket that's perfect for storing smaller belongings. It is an ideal gear hauler for liveaboard use, as a hotel to dive boat gear transporter or for carrying a full set of dive equipment.

- Duffel-style mesh bag provides lots of cargo space.
- Top-loading U-shaped opening makes it easy to load gear.
- Extra inside pocket is provided for storing small belongings.
- YKK Vision® zipper features double-sliders with white cord pulls for added convenience.
- Shoulder strap is adjustable and removable.
- Double duffel straps with padded handle make hefting the load that much easier.
- Bottom has an eyelet for water evacuation.
- Dimensions (approximate): 27.6x15.4x15.4in/70x39x39cm Weight: 1.6lbs/0.730kg Volume: 25gal/95L

DRY BAG BACKPACK 120L

You won't find a waterproof bag that carries more gear or transports it as easily as the Dry 120. Made from a supertough fabric blend - 85% 500D nylon and 15% polyester backed by a TPU coating - this dry bag rolls on a pair of saltwater-resistant wheels and includes a weather-proof zipper. Offering loads of cargo-carrying capacity, this bag is perfect for keeping dry gear safe from the elements, or keeping wet gear from soaking your car's back seat or trunk after the dive.

- Built with a blend of 500D nylon (85%) and polyester (15%) backed by a TPU coating.
- YKK weatherproof zipper is reliable, easy to use and seals contents from the elements.
- Reinforced base and saltwater-resistant wheels protect the bag while making easy work of transporting gear.

DRY BAG BACKPACKS

These backpack-style dry bags are the ideal carriers to transport your gear and protect it from water, sand and dust while out on diving tours or other outdoor activities. The bags are 100% dry, thanks to a super-tough fabric blend - 85% 500D nylon and 15% polyester backed by a TPU coating. On both bags, the roll-and-close system is super-easy to use, and an outside zippered pocket keeps smaller items accessible. A comfortable padded backpack system makes for effortless gear hauling.

- Built with a blend of 500D nylon (85%) and polyester (15%) backed by a TPU coating.
- Seals contents from the elements with a reliable roll-andclose top opening.
- Outside zippered pocket keeps smaller items accessible.
- Includes carry handle and backpack straps.

OCEAN CLEAN UP BAG

Divers can do their part to keep the oceans clean by carrying a SCUBAPRO Cares Ocean Clean Up Bag folded away in a BCD pocket. While out on a dive, if you come across a rusty can, a bit of plastic, or other underwater litter, simply unfold the bag and load the trash. The fabric and mesh construction allows water to flow through, minimizing drag, plus makes for easy cleaning after returning to the surface and emptying the bag into a trash receptacle. A Hook & Loop closure keeps the contents secure, and large double D-rings can be used as handles and provide clip-off points for attaching to a BCD or belt equipped with a carabiner (not included). A blue bungee keeps the bag neatly rolled up when not in use.

JAWZ Ti

More than a dive knife, the JAWZ Ti™ is a versatile, all-in-one multi-purpose rescue tool for dive professionals. It is designed to be worn on the upper chest area of a BCD using a TacWare™ J-clip (included) that allows instant access to the tool. Easy one-handed operation is ideal for cutting jobs in low visibility or restricted movement environments. The JAWZ Ti™ effectively cuts rope, monofilament line, netting, webbing and other materials commonly encountered under water. Each tool is made from Grade 38 ATI 425 ballistic titanium with 316 stainless steel hardware. Handles and sheaths are made from either heat-injected molded polypropylene thermoplastic, or polypropylene thermoplastic with glow-in-the-dark phosphorescent strontium aluminate to increase functionality in low-light conditions.

The JAWZ Ti[™] features two main cutting surfaces with three distinct cutting areas: a cutting blade on the spine for cutting above or behind the head, an aggressive full length serrated blade, and a curved hooked blade for pull cuts or slashing. On the end of the handle a pointed breaker is provided for breaking glass or creating starter holes prior to cutting. Put them together and you have a high-performance specialty tool for a wide range of surface and underwater operations. Its unique warranty makes it the last dive tool you'll ever own.

- An essential tool for search and rescue, military and survival applications.
- ATI 425 titanium alloy exceeds the corrosion resistance, ballistic and strength requirements of MIL-DTL-46077 titanium armor plate.
- Metal is PVD-BLACKCAT™ coated for corrosion resistance and durability. PVD-BLACKCAT™ is a "green" coating that uses no harsh chemicals in its production and offers a durable, attractive, performance-enhancing finish.
- Glow-in-the-dark handles and sheaths can be recharged by any form of UV light, including sunlight.
- Index finger grip and thumb grip on the spine make for easy one-handed operation.
- Highly aggressive serrations can cut through a variety of materials found under water.
- Cutting surface on spine is effective at slicing through monofilament line and netting.

- Serrated hook is good for cuts that require pulling or slashing rather than a sawing motion.
- Blunted nose protects against puncturing BCD bladders or hoses.
- Pointed breaker on the handle is highly effective against laminated glass and for creating starter holes before cutting.
- Available in either black with a yellow glow-in-the-dark handle or black with a black handle.
- TacWare™ J-Clip, made of highstrength polymer, is designed to hold up to heavy, long-term EDC (Every Day Carry) use. It can be attached to 1.5"-1.75" belt widths and up to triple-layer nylon webbing. A built-in finger-grab allows for easy removal.
- A sheath is included.
- Manufactured by LIFELINE Tactical Rescue Tools, 100% made in the USA.

MAKO

The ultimate compact dive knife, the Mako offers a multi-function blade that includes a serrated edge, a conventional edge, a line-cutting notch and a bottle opener. The Tanto tip, with its angled shape, is one of the strongest knife points available and, combined with the different blade edges, makes the Mako an excellent general-purpose dive knife. Offered in 304-grade hard-tempered stainless steel to resist surface oxidation or in hardened titanium for excellent corrosion-free cutting performance.

- Compact knife is 7.5in/19.7cm long overall with a 3.5in/8.5cm blade.
- Knife handle offers plenty of gripping area as well as thumb guards to keep the knife from slipping.
- Locking sheath features a convenient one-hand release mechanism.
- Kit for mounting knife onto a BCD is included.
- A convenient bottle opener is provided on the end of the handle.

TK15

The TK15 is the first of a new "Tactical" series of dive knives. It is built around a single piece of marine-grade stainless steel that's been machined to achieve the ideal balance of strength and weight. Its surface is specifically polished to let the water drain easily and prevent oxidation. The thickness of the stainless steel is consistent from one end to the other, creating a high level of stiffness. The blade is 6in/15cm long and features a lower smooth-edge and an upper serrated edge close to the handle to maximize control of the cut. There's also a line cutter. The knife comes with a heavy-duty handle and a fiberglassreinforced polyamide sheath with nylon straps. Also included is a SCUBAPRO branded hand cover with bungee for securing the knife to the hand in critical dive conditions.

PRICE	
MRP	311.00
Part Number	Description
32.009.100	Knife

- Built with marine-grade stainless steel, the best material for maintaining cutting edge reliability and resisting corrosion.
- Substantial 6in/15cm blade offers plenty of heft and cutting power.
- Both smooth and serrated blade edges are designed to meet any cutting situation.
- Heavy-duty handle with stainless steel screws provides a reliable hand-hold when wearing gloves.
- Fiberglass-reinforced polyamide sheath with nylon straps delivers reliable knife protection.
- Recesses in the handle matched to teeth in the sheath enable the knife to stay securely in place.

NOVA 1000R & 1000R WIDE

The Nova 1000R is an upgraded version of the Nova 850R, delivering increased lumens for even brighter illumination, a focused 8º beam angle and uses a powerful new 21700 li-ion battery that pumps out 40% more burn time. Built to last, this compact dive light is machined from heavy-duty black matte aluminum and includes an extended light head shroud to control the beam. A must-have piece of gear for any night dive or day dive, an easy-to-use push-button switch activates the light, and a 50% mode allows you to extend your burn time if you don't need full power. The Nova 1000R Wide delivers the same illumination and offers the same features as the Nova 1000R, but is equipped with a wider 80º beam, making it the perfect primary night diving light.

- Rugged matte black aluminum body with blue accents offers a high-quality look while providing lightweight, long-term durability.
- New! 1000+ lumens for super bright illumination.
- Equipped with a Cree XPL LED (Nova 1000R).
- Equipped with a Cree XML LED (Nova 1000R Wide).
- 21,000 lux @1m (Nova 1000R).
- Beam angle: 8º (Nova 1000R).
- Beam angle: 80º (Nova 1000R Wide).
- 21700 li-ion battery delivers 40% more burn time than the old 18650 battery and is widely used in modern rechargeable products.

- Double O-ring seals ensure watertight integrity.
- Push-button switch is easy to activate, even when wearing gloves.
- Extended light head shroud prevents the light beam from blinding other divers.
- Over-pressure valve releases battery off-gassing.
- A depth rating of 492ft/150m ensures worry-free lighting in virtually all diving conditions.
- Packaged in a reusable semi-soft box with a lanyard.
- Powered by: a single 21700 li-ion rechargeable battery (not included).
- Burn time: up to 2.5 hours on full power.

NOVA 850 TEC

In underwater lighting where performance, reliability and simplicity are the keys to success, nothing beats the Nova 850 Tec. This rugged single-mode dive light delivers intense 850 lumen illumination with a focused beam, ideal for lighting up those dark compartments in wrecks, caves and hidden crevices in deep-water reefs. The light is machined from heavy-duty aluminum so is both lightweight and built to last. It is also easy to use, with simple twist-on/twist-off activation. The light comes with a convenient centered attachment point for attaching a bolt snap – usually with a short length of cave line – so it can be securely clipped to a D-ring when not being used. Divers looking for simple yet serious underwater illumination for night dives as well as day dives will find the Nova 850 Tec a smart choice.

- Rugged matte black aluminum body with blue accents offers a stealthy tech look while providing lightweight, long-term durability.
- 850 lumen illumination.
- Equipped with a Cree XPL LED.
- 17,000 lux @1m.
- CCT (correlated color temperature): 4200ºK.
- Beam angle: 8º.
- Double O-ring seals ensure watertight integrity.

- Easy twist-on/twist-off activation allows for trouble-free operation, even when wearing thick gloves.
- Extended light head shroud prevents the light beam from blinding other divers.
- Over-pressure valve releases battery off-gassing – a safety feature not normally found on dive lights at this price point.
- A depth rating of 1000ft/300m ensures worry-free lighting in virtually all diving conditions.
- Lanyard not included.

30.226.100	Nova 850 TEC

• Burn time: up to 7 hours on full power.

NOVA 250

The Nova 250 is a versatile dive light that can be stored in the smallest BCD pocket. It offers three modes: 100% power, 50% power and Flash, plus is equipped with an over-pressure valve to release battery off-gassing, making it the safest small light on the market. Delivering 250 lumens of illumination, the Nova 250 is powered by a CR123 battery (rechargeable or disposable). The CR123 disposable battery features a shelf life of up to 10 years so you don't have to worry about it if it stays in your BCD pocket over the winter.

- Measures 3.9 in/100mm long.
- Weight (w/battery): 2.5oz/70g.
- Rugged matte black aluminum body with blue accents offers a stealthy "tech" look while providing lightweight long-term durability.
- Equipped with a Cree XPG LED.
- 250 lumen illumination.
- 2700 lux @1m.
- CCT (correlated color temperature): 4500°K
- Beam angle: 12º.
- Three modes: 100% power, 50% power and Flash.
- Push-button switch on the end of the light is easy to activate when wearing gloves.

- Double O-ring seals ensure watertight integrity.
- Extended light head shroud prevents the light beam from blinding other divers.
- Powered by a CR123 battery (sold separately).
- Over-pressure valve releases battery off-gassing – a safety feature not normally found on dive lights of this size.
- A depth rating of 492ft/150m ensures worry-free lighting in virtually all diving conditions.
- Burn time: up to 5 hours.

S-TEK PRO SYSTEM PACKAGED SETS

The S-Tek Pro's revolutionary design combines premium-plus materials and construction with purist features and technology to create the ultimate adjustable back plate and wing system for technical diving. Designed for both utility and comfort, this system features a 3D formed back plate with harness that includes individually adjustable TEK LOC shoulders to ensure a snug fit as well as make donning and doffing easy. Shoulder buckles & D-rings can be adjusted up or down to conform to different torso lengths. To enhance comfort, shoulder and waist straps are fitted with molded Monprene® pads that provide excellent cushioning without creating bulk or inherent buoyancy. Stainless steel hardware includes a waist buckle, two pre-bent D-rings on the shoulders, two D-rings on the waist, and two D-rings on the crotch strap. The stainless steel backplate comes with Evo-Angle webbing slots for a more natural webbing routing that increases comfort and reduces webbing abrasion. The backplate also provides trim weight system mounting holes, an argon tank mounting point for drysuit divers, a Monprene® pad for comfort, 2 x S-Tek Ergo Nuts, plus a convenient built-in carry handle. The system is available with either a 30-, 40- or 60-pound-lift donut wing, with the 30 and 40 wings being suitable for single tank diving and the 40 and 60 wings for twin tank diving. The 30-pound system includes an aluminum single tank adapter. The S-Tek Pro is built tough and is loaded with features, making your time at depth safer, more comfortable, and more enjoyable.

- Adjustable TEK LOC shoulders contribute to a snug, individualized fit.
- Shoulder buckle & D-ring heights can be adjusted to suit different torso lengths.
- Molded Monprene® pads cushion shoulders, waist and back to optimize comfort.
- Two pre-bent D-rings on the shoulders, two straight D-rings on the waist, and two D-rings on the crotch strap are provided for clipping on extra gear.
- Branded silicone epaulet on the left shoulder and branded silicone guide bands keep inflator hose in place and straps in place.
- Donut wing (30lbs, 40lbs or 60lbs) is constructed of a 1000 D Cordura outer shell and 500 D Cordura inner bladder.

- Padded stainless steel back plate offers Evo-Angle webbing slots plus mounting points for trim weights and an argon tank for drysuit divers.
- Back plate includes a Monprene® pad for comfort, plus a convenient built-in carry handle.
- 2 x S-Tek Ergo Nuts ergonomically designed, easier to tighten and loosen, and flushed mounted to prevent abrasion.
- Aluminum single tank adapter is included with the 30lb system.
- Back plate features fully radiused edges and a softened organic shape, along with the back plate's recessed wingnut socket, rationalized hole count and positioning, and webbing bolt hole alignment increase diver comfort & make for a smart design.

S-TEK PURE SYSTEM PACKAGED SETS

Technical divers who subscribe to the DIR (Doing It Right) approach to streamlined and minimalistic equipment configurations will appreciate SCUBAPRO's S-Tek Pure back plate/wing system. This simple yet rugged system consists of a continuous-web harness teamed with a revolutionary designed 3D formed stainless steel back plate and a donut wing. Stainless steel hardware includes a waist buckle, two pre-bent D-rings on the shoulders, one D-ring on the waist, and two D-rings on the crotch strap. The stainless steel backplate comes with Evo-Angle webbing slots for a more natural webbing routing that increases comfort and reduces webbing abrasion. The backplate also provides trim weight system mounting holes, an argon tank mounting point for drysuit divers, a Monprene® pad for comfort, 2 x S-Tek Ergo Nuts, plus a convenient built-in carry handle. The system is available with either a 30-, 40- or 60-pound-lift donut wing, with the 30 and 40 wings being suitable for single tank diving and the 40 and 60 wings for twin tank diving. The 30-pound system includes an aluminum single tank adapter. The S-Tek Pure is a rugged and reliable tech diving system designed for those extended trips into the depths.

- Continuous webbing harness provides a custom, individualized fit.
- Can be configured as a fixed-shoulder length harness for ultimate simplicity or in Extender mode that allows the shoulder straps to extend for easier doffing & donning.
- Stainless steel waist buckle allows for a full range of adjustment.
- Two pre-bent D-rings on the shoulders, one D-ring on the waist, and two D-rings on the crotch strap are provided for clipping on extra gear.
- Branded silicone epaulet on the left shoulder and branded silicone guide bands keep inflator hose in place and straps in place.
- Stainless steel back plate offers Evo-Angle webbing slots plus mounting points for trim weights, an argon tank for drysuit divers, plus a convenient built-in carry handle.

- 2 x S-Tek Ergo Nuts are ergonomically designed, easier to tighten and loosen, and flushed mounted to prevent abrasion.
- Donut wing (30lbs, 40lbs or 60lbs) is constructed of a 1000 D Cordura outer shell and 500 D Cordura inner bladder.
- Aluminum single tank adapter is included with the 30lb system.
- Back plate features fully radiused edges and a softened organic shape, along with the back plate's recessed wingnut socket, rationalized hole count and positioning, and webbing bolt hole alignment increase diver comfort & make for a smart design.

S-TEK PRO HARNESS W/BACK PLATE

SCUBAPRO's S-Tek Pro Harness combines premium-plus materials and construction with purist technology and features in a revolutionary designed Back Plate that's sure to excite the technical diving community. Designed for both utility and comfort, the harness includes individually adjustable stainless steel TEK LOC shoulder buckles to ensure a snug fit as well as easy donning and doffing. Shoulder buckles and D-rings can be adjusted up or down to conform to different torso lengths. To enhance comfort, shoulder and waist straps are fitted with molded Monprene® pads that provide excellent cushioning without creating bulk or inherent buoyancy. Stainless steel hardware includes a waist buckle, two pre-bent D-rings on the shoulders, two D-rings on the waist, plus two D-rings on the crotch strap. The harness comes with a revolutionary 3D formed back plate - either a corrosion-resistant stainless steel or lightweight aluminum back plate, both with Evo-Angle webbing slots for a more natural webbing routing that increases comfort and reduces webbing abrasion. The backplate also provides trim weight system mounting holes, an argon tank mounting point for drysuit divers, a Monprene® pad for comfort, 2 x S-Tek Ergo Nuts, plus a convenient built-in carry handle. These premium plates feature a softened organic shape with fully radiused edges and recessed Wing-Nut Sockets that are compatible with standard Wing Nuts or the included S-Tek ERGO NUTS.

S-TEK DONUT WINGS

BPW divers can depend on reliable buoyancy control regardless of their diving position with SCUBAPRO's line of S-Tek donut wings. Available in three sizes, S-Tek donut wings offer rounded profiles to allow for smooth, controlled air migration. Built to last, the 500 D Cordura inner bladder is protected by an outer shell made of dope-dyed, colorfast 1000 D Cordura that delivers industry-leading abrasion resistance. Each wing comes with an elliptical EPDM corrugated inflator hose and SCUBAPRO's K-style BPI.

brands.

S-TEK SINGLE TANK ADAPTER

The S-Tek Single Tank Adapter is a convenient way to switch from double tank to single tank diving. Made from marine-grade aluminum, the design of this adapter makes it much easier to attach the tank using a single cinch band. It offers more vertical adjustability, fixed bolts for easy attachment and removal, and a rubber grip pad to help hold the tank securely in place. A tank height adjustment strap with quick-release buckle is included.

• Made of lightweight marine-grade
aluminum.

- Single cinch band makes for easier tank attachment.
- Design offers more vertical adjustability for fine-tuning tank positioning.
- Rubber grip pad helps keep tank securely in place.
- Fixed bolts allow for easy attachment and removal.
- Includes tank height adjustment strap with quick-release buckle.

S-TEK STAGE KIT

LOW PROFILE

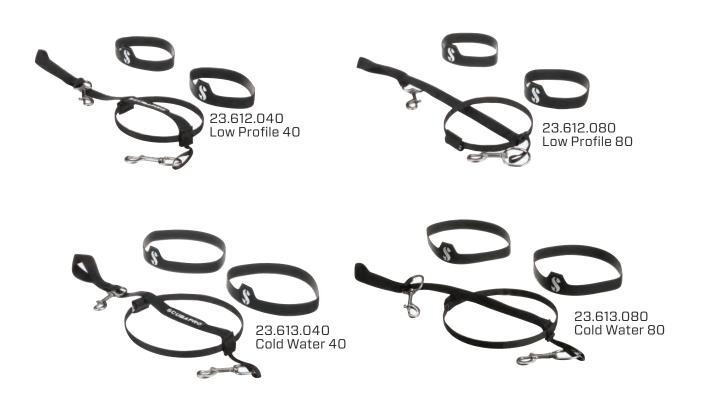

A professional and streamlined solution for mounting stage and deco cylinders. Featuring heavy-duty 25mm Military-grade polyester webbing construction, the kit includes two stainless steel bolt snaps, a stainless steel hose clamp (covered in durable tubular webbing to provide protection from cuts and abrasions), and branded silicone hose retention bands that fit securely around the tank and feature an ergonomically raised lip for easier handling.

COLD WATER

Featuring a more traditional profile, this is an ideal solution for mounting stage and deco cylinders for cold or gloved hands. Oversized tubular webbing construction and 'Big-Eye' stainless steel bolt snaps make handling stage tanks a breeze. Kit includes a stainless steel hose clamp (covered in durable tubular webbing to offer protection from cuts and abrasions) and branded silicone hose retention bands that fit securely around the tank and feature an ergonomically raised lip for easier handling.

S-TEK TRIM WEIGHTS KIT

Here's an easy way to add trim weights to your harness system to improve your at-depth trim position. The kit mounts on a back plate and includes a mounting baton with all necessary mounting hardware and two trim pockets that each hold up to 2.2lbs/1kg of ballast weight.

- Enables you to distribute your ballast weight for optimum balance and in-water stability.
- Kit includes mounting baton, all mounting hardware and two trim pockets.
- Each pocket can accommodate 2.2lbs/1kg of ballast weight.
- Fit up to two kits (four trim pockets) per back plate.
- Designed for use with the S-Tek Single Tank Adapter.
- Trim pockets can also be attached to 2"/50mm waist webbing.

S-TEK EXPEDITION THIGH POCKET

Expand your equipment carrying capability by adding an S-Tek Expedition Thigh Pocket to your diving rig. Made of heavy-duty 1000D Cordura, a large protective overflap secures contents with an easy-open buckle that can be opened and closed with one hand. A stainless steel bolt snap mounted on top clips onto a waist harness D-ring, while the adjustable strap on the back secures the pocket to your thigh. An internal bungee loop is provided for securing items and the pocket's proportions are generous, providing space for equipment like dive lights, marker buoys, spare masks or compact cameras.

S-TEK EXPEDITION REELS

When serious tech divers need a serious reel, SCUBAPRO's S-Tek Expedition Reel delivers. Evoking the distinctive design of SCUBAPRO's classic G250 second stage, this reel is rugged throughout, featuring a marine-grade anodized aluminum frame with a durable injection-molded fiberglass reinforced nylon drum plus stainless steel axle and screws. The antisnag stainless steel lock-down screw is located at the opposite end of the handle from the line exit; this makes for better ergonomics while reducing the risk of line snags. A handy line capacity gauge lets you know how much line has played out, and an ergonomic anti-snag winder makes line retrieval easy.

- Durable construction includes a marine-grade anodized aluminum frame, injection-molded fiberglass reinforced nylon drum and stainless steel axle and screws.
- Anti-snag stainless steel lock-down screw located at the opposite end of the handle from the line exit improves ergonomics while reducing the risk of line snags.
- Anti-release eyelet for the bolt snap ensures security.
- Ergonomic anti-snag winder allows for problem-free line retrieval.
- Integrated stealth line cleat and removable Torben-Loc line anchor provide two options for securing the line-end to avoid losing it through the line guide exit.
- Included: a line capacity gauge and stainless steel bolt snap.

S-TEK SPINNER SPOOLS

Evoking the distinctive design of SCUBAPRO's classic G250 second stage, these premium spinner spools come in three line lengths and are super easy to use. The key to each spool's user-friendliness can be found in the exclusive SCUBAPRO-branded spinner discs located at the center point of the spool; the discs remain static while the spool spins and the line plays out. Consequently, the spool will not try to rotate out of your hand like normal spools do, allowing for a more secure grip while playing out line. You can adjust the tension on the line by squeezing the spinner discs together, forming a disc brake effect.

- Spinner discs remain static while the spool spins, so the spool will not rotate out of your hand like normal spools can.
- Design allows for a secure, comfortable grip while playing out line.
- Made of durable injection-molded fiberglass reinforced nylon with stainless steel axle and screws.
- Body of the spool is designed so that it can be easily clipped off to a bolt snap.
- Includes a stainless steel bolt snap.
- Available in three line lengths (50ft/15m, 100ft/30m, 150ft/45m).
- Also available: spinner disc color kits.

S-TEK MARKERS

COOKIE MONSTERS

These circular personal cookie markers attach securely to guidelines and can be used to mark reference points or to indicate the presence of individual divers. Included in the package are 10 cookie markers threaded on a bungee cord with a stainless steel bolt snap.

ARROW MONSTERS

These arrows are great for use as directional line markers on cave and wreck dives. The arrow shape gives clear visual directional information, plus allows for easy identification by feel in low visibility conditions. Included in the package are 10 arrow-shaped directional markers threaded on a bungee cord with a stainless steel bolt snap.

S-TEK HARDWARE

GLIDES

Use SCUBAPRO's S-Tek Tri-glides with smooth-bar to lock in ballast weights on a weight belt, mount D-rings, anchor webbing and much more. Typically found on shoulder straps, the Quad-glide offers an additional slot over the Tri-glide and prevents slipping of D-rings when under a heavy load. The 50mm size is sized perfect for use on standard 2in/50mm harness webbing.

D-RINGS

40.204.002

Maximize the number of attachment points on your dive harness by adding quality marinegrade stainless steel D-rings. The 50mm size is perfect for mounting on standard 2in/50mm harness webbing. Available in both straight and pre-bent versions.

S-TEK FIN

The S-Tek Fin is a purpose-built, next-gen technical diving fin providing maximum power when you need it. Constructed of durable Monprene® for maximum durability and designed with an ultra-streamlined profile, the S-Tek Fin's 30º pre-angled blade requires less deflection to achieve the desired angle of attack for an efficient kick. This allows for a stiffer blade without increasing drag, thereby reducing leg cramps and ankle strain while delivering unbeatable maneuverability and alternate kick performance. In particular, the S-Tek Fin excels in frog kicks, backward kicks and helicopter turns, plus produces a high-torque flutter kick.

- Clean Water Blade and Vented Blade design reduces drag and increases thrust.
- Hydra-Loop ramped and reinforced leading edge improves lateral rigidity for improved alternate kicks, plus creates a hydrofoil profile for better thrust.
- Removable Stainless-Steel Weight Plate System lets you choose between a positively buoyant, neutrally buoyant, or negatively buoyant fin.
- The S-Tek Fin's two-piece design, with blade and foot pocket molded separately, makes transport easy.
- Blade and foot pocket are molded separately with a durable Socket-Lock Connecting System that allows for easy assembly and disassembly.
- Open heel foot pocket features an upgraded heavy-duty bungee strap that allows for micro-adjustments to accommodate different boot types.
- The Complete Fin is available in black in 5 sizes (XS, S, M with Midi blades;
 L, XL with Maxi blades) and includes a Multi-Tool and 2 sets of Lock Plates, a
 Stainless-Steel Weight System and a SCUBAPRO boat bag.
- The Blade Only is available in black in 2 sizes (Midi, Maxi) and includes a Multi-Tool and 1 set of Lock Plates, a Stainless-Steel Weight System and a SCUBAPRO boat bag.
- Compatible with Modular Fin System foot pockets.

- 1 Pair of S-Tek Fins [A]
- Stainless Steel Weight System [B
- MFS Multi Tool (C)
- 2 sets of Lock Plates (D)
- SCUBAPRO Boat Bag (E)

HELMETS

The SCUBAPRO SAR FAST Bump Helmet, with its glass-filled nylon shell and high-cut design, is ideal for search and rescue operations on land or in the water. Its rugged construction protects the head in environments where the possibility of blunt force trauma is limited. A molded front NVG shroud interfaces with standard night vision goggles brackets, and a four-position Accessory Rail Connector (ARC) and external side Velcro® loop provide attachment points for a variety of mission-configured components.

- Vent holes for increased ventilation and water drainage.
- Chinstrap Extraction for cold water and full-face mask diving.
- Lights can be added to the ARC Rail or with the Ops Core Single Clamp, as well as cameras and other accessories.
- The SCUBAPRO SAR FAST Bump Helmet meets BS EN 1385: 2012, Ops-Core FAST Bump Performance Specification PS-1145.

The FAST Helmet Systems have been designed to fit the largest group of users in helmet sizes that most closely match their head. Follow the sizing guide to determine your helmet and chinstrap size. Be sure to pull the measuring tape tight against your head and face while measuring. Once a measurement is taken, refer to the corresponding guide to determine your size. If one guide recommends a different size than the other, choose the larger of the two sizes.

Please note our chinstrap sizing (ruler illustration below) has intentionally been designed to overlap so that it fits the largest group of users in our standard helmet sizes.

Run measuring tape along front edge of ear.

Ruler is in inches

SCUBAPRO RAPID SYSTEM PACKAGE (SRS)

EMERGENCY DETACHABLE SCUBA EQUIPMENT (RAPID DIVER SYSTEM)

This special use BCD is designed to face all of the emergency situations where time is a key factor. Unlike traditional BCDs, this unit is set up in a front mount configuration [max. 33 CF / 5 liters].

SCUBAPRO's new SRS is designed to be donned quickly in the event of an emergency, military action, or to deal with any unexpected underwater situation at a moment's notice. The double horse collar-style BCD is PU-coated on the outside, making it easy to sanitize and dry, and it comes with a TEK BPI and double tank cinches. An optional rear tank set-up is also available. To create a full kit, additional products can be purchased separately including regulator systems, analog pressure gauges, knives and tools.

- Large volume donut shape.
- One size fits all design.
- PU coated outer shell makes it easy to sanitize and dry.
- TEK BPI is based on a K-style layout which offers an extremely robust and lightweight design for smooth, balanced air control during inflation/deflation.
- Front mount bottle configuration.
- Convenient MOLLE system across the front for attaching accessories, pockets, cutting devices and more.
- Two hook & loop patches on the right chest and back to attach badges.
- Zippered sleeve and rear neck hook & loop strap allows for streamlined rigging of the LP hoses.
- Includes a cloth carry bag.

NOVASCOTIA 7.5MM SEMI-DRY STEAMER, ALL BLACK

The NovaScotia All-Black 7.5mm semi-dry, with its no-nonsense jet black design, is the perfect solution for staying very warm and relatively dry while virtually eliminating hydrodrag, which radically improves a military or professional diver's ability to move easily through the water. Offering a flexible fit and first-rate thermal properties, the NovaScotia All-Black's 7.5/6.5mm thickness, easy-zip waterproof YKK Aquaseal Vislon zipper, improved plush lining and long list of convenience features, make this impressive all-black semi-dry the military and professional diver's answer to a rugged and comfortable semi-dry dive suit, ready for any mission.

- All-black design delivers a nononsense look for military and professional divers ready to get the iob done.
- CE certified a Class A dive suit

 rated for water temperatures
 ranging from 45°F (7°C) to 54°F (12°C).
- Made with X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.
- Suit is assembled using a solventfree glue.
- Pure Design Concept uses fewer seams and panels to ensure maximum flexibility.
- Blind-stitched seams block water entry.
- Internal stress discs installed at stitch intersections reinforce seams, extending the suit's working life.
- Rear shoulder-to-shoulder YKK
 Aquaseal Vision waterproof main
 zipper with heavy-duty plastic slider
 is flexible yet provides an excellent
 seal against water entry.
- Plush interior liner in the arms, legs and shoulder areas increases warmth and stretch.
- Zippered seals on ankles and wrists feature brass sliders for durability, water-tightness and ease of use.
- Fold-under neck seal is ultracomfortable and keeps water seepage to a minimum.

•	Right thigh 3D pocket offers lots	of
	room for carrying extra gear	

- A hood hook is positioned on the outside of the pocket for added convenience.
- Anti-abrasion patterns on shoulders and kneepads provide protection and extend the life of the suit.
- Enhanced spine pad provides a welcomed cushion where the tank hits the diver's back.

CLASSICO 7.5/6MM FARMER JOHN, ALL BLACK

Designed for hard-working divers everywhere, the Classico showcases an updated design based on Everflex dive suits and uses SCUBAPRO's exclusive Pure Design Concept and strategically placed pre-formed shapes that allow this top-rated suit to move more naturally with your body, delivering unparalleled comfort and flexibility. Made from X-Foam neoprene, the long john is 6mm while the jacket is 7.5mm. Put them together and you have some serious thermal protection for cold-water divers. All panels (except those with abrasion-resistant fabric) feature a super-stretchy nylon outer lining to increase overall range of motion, and the insides of both jacket and long john are lined with a comfortable black plush. Shoulders and seat area are protected with abrasion-resistant fabric for added durability. The attached hood has a face seal to help keep water out, and is also lined with black plush for comfort.

- Designed for military, professional, commercial, police divers and more.
- Made with X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.
- Suit is assembled using a solventfree glue.
- Pure Design Concept uses fewer seams and panels for maximum range of motion.
- Pre-formed dimensional shapes deliver unparalleled comfort and flexibility.
- · Blind-stitched seams block water entry.
- Abrasion-resistant high-stretch

- material on the outside of the suit increases durability, extending the life of the suit.
- Black plush inner lining on jacket, long john and hood enhance comfort
- Half-zipper on the lower left side of the jacket allows for easy donning and eliminates a zipper in the neck/hood area to maximize head comfort.
- Jacket's beavertail secures with 2 rotating nylon clips.
- Internal cuff seals on ankles and wrists minimize water intrusion.
- Ankle zippers make donning the long john easy.

ONEFLEX STEAMERS, 5 & 3MM, ALL BLACK

Oneflex 5mm and 3mm steamers deliver superb thermal protection for military and professional divers working in temperate-water or warm-water locales. Offering straightforward styling, the suits are designed with a triathlon cut that allows for lots of range of motion in the shoulder and arm areas. They are also built using the Pure Design Concept which uses fewer seams and panels for maximum flexibility, and their 2-sided polyester lining is ultra-durable yet stretchy and comfortable. The addition of outside stretch fabric on arms and the underarm areas contributes to making the suits much easier to don and doff while increasing comfort and freedom of movement. The diagonal rear YKK zipper is easy to use and is built tough for long-term durability. These rugged Oneflex steamers get the job done.

- Made from X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.
- Suit is assembled using a solventfree glue.
- Triathlon cut employs wider panels covering the underarm and back areas, allowing unrestricted arm and shoulder movement.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Ultra-durable 2-sided polyester lining provides excellent resistance to heat, UV rays and chlorine, substantially extending the life of the suit, even after repeated use.

- Diagonal rear YKK zipper with brass slider offers increased long-term durability and ease of use.
- Single YKK zippers on ankles and wrists feature durable brass sliders and pull tabs, and the built-in cuff seals are comfortable and easy to use
- Anti-abrasion patterns on shoulders and kneepads provide protection and extend the life of the suit.
- Zippered pockets on both legs provide a secure spot for carrying tools or accessories.

EVERFLEX 3MM HOOD, SAR

The red and yellow Everflex 3mm SAR hood provides extra thermal protection for professional divers while offering high visibility when working on the surface. The hood is made with a 100% high-stretch Everflex nylon outside lining for maximum flexibility, plus includes a face seal to cut down on heat loss from water transfer. It is designed with an extended bib that can be paired with any SCUBAPRO hoodless SAR wetsuit or shorty, plus comes with a plush interior lining for comfort. It's a must-have addition for cold-water dives and extended warm-water dives.

- Bright red and yellow colors make the hood easy to see in and out of the water.
- Made with X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.
- Bibbed design maximizes comfort and protection when used with hoodless steamers and shorty.
- Suit is assembled using a solventfree glue.
- Inside is lined with soft and quickdrying plush for enhanced comfort during extended dives.
- Slick face seal cuts down on heat loss from water transfer.
- Reflective panel on top increases visibility at depth and on the surface.

FULL-FACE MASK

SCUBAPRO's Full-Face Mask is a professional-quality mask designed for maximum safety and comfort while diving in very cold water, diving in wrecks or caves or when technical diving. The design is also ideal for using a secondary air source, diving in contaminated environments or employing an underwater communication system. The mask is widely used by military and commercial divers worldwide.

- Reduced weight increases comfort during extended dives.
- Design features separate compartments for nose and mouth.
- Top compartment is equivalent to a dual lens mask.
- 5 point "spider" strap system enables mask to perfectly fit the face and comfortably spread strap tension.
- Stainless steel, quick-adjust, positive-lock buckles provide safety, comfort and reliability.
- Mineral anti-fogging treated lenses offer a clear field of view.
- Chemically resistant silicone skirt prevents damage when

diving in contaminated waters.

- One-way valve provides an optional alternate air source adapter.
- Direct inhalation is possible with or without internal mouthpiece.
